|--|-------------|
| Preface | xiii |
| Introduction | xv |
| 1 Representing positive numbers as lengths of segments | 1 |
| 1.1 Inequalities associated with triangles | 2 |
| 1.2 Polygonal paths | 4 |
| 1.3 n -gons inside m -gons | 5 |
| 1.4 The arithmetic mean-geometric mean inequality | 6 |
| 1.5 More inequalities for means | 11 |
| 1.6 The Ravi substitution | 13 |
| 1.7 Comparing graphs of functions | 15 |
| 1.8 Challenges | 17 |
| 2 Representing positive numbers as areas or volumes | 19 |
| 2.1 Three examples | 20 |
| 2.2 Chebyshev's inequality | 21 |
| 2.3 The AM-GM inequality for three numbers | 24 |
| 2.4 Guha's inequality | 29 |
| 2.5 The AM-GM inequality for n numbers | 29 |
| 2.6 The HM-AM-GM-RMS inequality for n numbers | 31 |
| 2.7 The mediant property and Simpson's paradox | 32 |
| 2.8 Chebyshev's inequality revisited | 34 |
| 2.9 Schur's inequality | 37 |
| 2.10 Challenges | 38 |
| 3 Inequalities and the existence of triangles | 43 |
| 3.1 Inequalities and the altitudes of a triangle | 44 |
| 3.2 Inequalities and the medians of a triangle | 46 |
| 3.3 Inequalities and the angle-bisectors of a triangle | 49 |
| 3.4 The Steiner-Lehmus theorem | 52 |
| 3.5 Challenges | 52 |

| | | |
|----------|---|------------|
| 4 | Using incircles and circumcircles | 55 |
| 4.1 | Euler's triangle inequality | 56 |
| 4.2 | The isoperimetric inequality | 60 |
| 4.3 | Cyclic, tangential, and bicentric quadrilaterals | 64 |
| 4.4 | Some properties of n -gons | 67 |
| 4.5 | Areas of parallel domains | 69 |
| 4.6 | Challenges | 70 |
| 5 | Using reflections | 73 |
| 5.1 | An inscribed triangle with minimum perimeter | 74 |
| 5.2 | Altitudes and the orthic triangle | 75 |
| 5.3 | Steiner symmetrization | 76 |
| 5.4 | Another minimal path | 78 |
| 5.5 | An inscribed triangle with minimum area | 79 |
| 5.6 | Challenges | 79 |
| 6 | Using rotations | 81 |
| 6.1 | Ptolemy's inequality | 82 |
| 6.2 | Fermat's problem for Torricelli | 83 |
| 6.3 | The Weitzenböck and Hadwiger-Finsler inequalities | 84 |
| 6.4 | A maximal chord problem | 87 |
| 6.5 | The Pythagorean inequality and the law of cosines | 88 |
| 6.6 | Challenges | 90 |
| 7 | Employing non-isometric transformations | 93 |
| 7.1 | The Erdős-Mordell theorem | 93 |
| 7.2 | Another Erdős triangle inequality | 99 |
| 7.3 | The Cauchy-Schwarz inequality | 101 |
| 7.4 | Aczél's inequality | 107 |
| 7.5 | Challenges | 108 |
| 8 | Employing graphs of functions | 111 |
| 8.1 | Boundedness and monotonicity | 111 |
| 8.2 | Continuity and uniform continuity | 117 |
| 8.3 | The Lipschitz condition | 118 |
| 8.4 | Subadditivity and superadditivity | 119 |
| 8.5 | Convexity and concavity | 120 |
| 8.6 | Tangent and secant lines | 124 |
| 8.7 | Using integrals | 128 |
| 8.8 | Bounded monotone sequences | 133 |
| 8.9 | Challenges | 135 |

| | |
|--------------------------------------|------------|
| 9 Additional topics | 137 |
| 9.1 Combining inequalities | 137 |
| 9.2 Majorization | 139 |
| 9.3 Challenges | 143 |
| Solutions to the Challenges | 145 |
| Chapter 1 | 145 |
| Chapter 2 | 147 |
| Chapter 3 | 152 |
| Chapter 4 | 154 |
| Chapter 5 | 156 |
| Chapter 6 | 157 |
| Chapter 7 | 159 |
| Chapter 8 | 162 |
| Chapter 9 | 166 |
| Notation and symbols | 169 |
| References | 171 |
| Index | 179 |
| About the Authors | 183 |
