Preface	vii
Acknowledgments	xiii
Introduction: A Brief Review of Elementary Number Theory	1
0.1 Linear Equations and Congruences	1
0.2 Quadratic Congruences Modulo Primes	6
0.3 Quadratic Congruences Modulo Composite Integers	10
Part One: Quadratic Domains and Ideals	15
1 Gaussian Integers and Sums of Two Squares	17
1.1 Sums of Two Squares	17
1.2 Gaussian Integers	25
1.3 Ideal Form for Gaussian Integers	32
1.4 Factorization and Multiplication with Ideal Forms	38
1.5 Reduction of Ideal Forms for Gaussian Integers	44
1.6 Sums of Two Squares Revisited	48
Gaussian Integers and Sums of Two Squares—Review	52
2 Quadratic Domains	55
2.1 Quadratic Numbers and Quadratic Integers	56
2.2 Domains of Quadratic Integers	61
2.3 Ideal Form for Quadratic Integers	68
2.4 Ideal Numbers	74
2.5 Quadratic Domains with Unique Factorization	80
2.6 Quadratic Domains without Unique Factorization	86
Quadratic Domains—Review	91
3 Ideals of Quadratic Domains	93
3.1 Ideals and Ideal Numbers	94
3.2 Writing Ideals as Ideal Numbers	99
3.3 Prime Ideals of Quadratic Domains	103
3.4 Multiplication of Ideals	107

3.5	Prime Ideal Factorization	112
3.6	A Formula for Ideal Multiplication	119
	Ideals of Quadratic Domains—Review	126
Part Two: Quadratic Forms and Ideals		129
4	Quadratic Forms	131
4.1	Classification of Quadratic Forms	131
4.2	Equivalence of Quadratic Forms	136
4.3	Representations of Integers by Quadratic Forms	140
4.4	Genera of Quadratic Forms	145
	Quadratic Forms—Review	151
5	Correspondence between Forms and Ideals	153
5.1	Equivalence of Ideals	154
5.2	Quadratic Forms Associated to an Ideal	158
5.3	Composition of Binary Quadratic Forms	164
5.4	Class Groups of Ideals and Quadratic Forms	170
	Correspondence between Forms and Ideals—Review	175
Part Three: Positive Definite Quadratic Forms		177
6	Class Groups of Negative Discriminant	179
6.1	Reduced Positive Definite Quadratic Forms	179
6.2	Calculation of Ideal Class Groups	186
6.3	Genera of Ideal Classes	190
	Class Groups of Negative Discriminant—Review	197
7	Representations by Positive Definite Forms	199
7.1	Negative Discriminants with Trivial Class Groups	200
7.2	Principal Square Domains	205
7.3	Quadratic Domains that Are Not Principal Square Domains	212
7.4	Construction of Representations	219
	Representations by Positive Definite Forms—Review	225
8	Class Groups of Quadratic Subdomains	227
8.1	Constructing Class Groups of Subdomains	227
8.2	Projection Homomorphisms	234
8.3	The Kernel of a Projection Homomorphism	239
	Class Groups of Quadratic Subdomains—Review	244
Part Four: Indefinite Quadratic Forms		245
9	Continued Fractions	247
9.1	Introduction to Continued Fractions	247
9.2	Pell's Equation	253

9.3	Convergence of Continued Fractions	259
9.4	Continued Fraction Expansions of Real Numbers	265
9.5	Purely Periodic Continued Fractions	269
9.6	Continued Fractions of Irrational Quadratic Numbers	274
	Continued Fractions—Review	281
10	Class Groups of Positive Discriminant	285
10.1	Class Groups of Indefinite Quadratic Forms	285
10.2	Genera of Quadratic Forms and Ideals	291
10.3	Continued Fractions of Irrational Quadratic Numbers	296
10.4	Equivalence of Indefinite Quadratic Forms	301
	Class Groups of Positive Discriminant—Review	304
11	Representations by Indefinite Forms	307
11.1	The Continued Fraction of a Quadratic Form	307
11.2	Units and Automorphs	316
11.3	Existence of Representations by Indefinite Forms	320
11.4	Constructing Representations by Indefinite Forms	326
	Representations by Indefinite Forms—Review	331
Part Five:	Quadratic Recursive Sequences	333
12	Properties of Recursive Sequences	335
12.1	Divisibility Properties of Quadratic Recursive Sequences	336
12.2	Periodicity of Quadratic Recursive Sequences	343
12.3	Suborder Functions	349
12.4	Suborder Sequences	356
	Properties of Recursive Sequences—Review	364
13	Applications of Quadratic Recursive Sequences	367
13.1	Recursive Sequences and Automorphs	367
13.2	An Application to Pell's Equation	371
13.3	Quadratic Subdomains of Positive Discriminant	376
	Applications of Quadratic Recursive Sequences—Review	381
Concluding Remarks		383
	References and Suggested Reading	384
List of Notation		387
Index		391
