Preface	v
<i>Jaroslav Dittrich, Hynek Kovařík, and Ari Laptev</i>	
Relative partition function of Coulomb plus delta interaction	1
<i>Sergio Albeverio, Claudio Cacciapuoti, and Mauro Spreafico</i>	
Inequivalence of quantum Dirac fields of different masses and the underlying general structures involved	31
<i>Asao Arai</i>	
On a class of Schrödinger operators exhibiting spectral transition	55
<i>Diana Barseghyan and Olga Rossi</i>	
On the quantum mechanical three-body problem with zero-range interactions	71
<i>Giulia Basti and Alessandro Teta</i>	
On the index of meromorphic operator-valued functions and some applications	95
<i>Jussi Behrndt, Fritz Gesztesy, Helge Holden, and Roger Nichols</i>	
Trace formulae for Schrödinger operators with singular interactions	129
<i>Jussi Behrndt, Matthias Langer, and Vladimir Lotoreichik</i>	
An improved bound for the non-existence of radial solutions of the Brezis–Nirenberg problem in \mathbb{H}^n	153
<i>Rafael D. Benguria and Soledad Benguria</i>	
Twisted waveguide with a Neumann window	161
<i>Philippe Briet and Hiba Hammedi</i>	
Example of a periodic Neumann waveguide with a gap in its spectrum	177
<i>Giuseppe Cardone and Andrii Khrabustovskyi</i>	
Two-dimensional time-dependent point interactions	189
<i>Raffaele Carlone, Michele Correggi, and Rodolfo Figari</i>	

On resonant spectral gaps in quantum graphs	213
<i>Ngoc T. Do, Peter Kuchment, and Beng Ong</i>	
Adiabatic theorem for a class of stochastic differential equations on a Hilbert space	223
<i>Martin Fraas</i>	
Eigenvalues of Schrödinger operators with complex surface potentials	245
<i>Rupert L. Frank</i>	
A lower bound to the spectral threshold in curved quantum layers	261
<i>Pedro Freitas and David Krejčířik</i>	
To the spectral theory of vector-valued Sturm–Liouville operators with summable potentials and point interactions	271
<i>Yaroslav Granovskyi, Mark Malamud, Hagen Neidhardt, and Andrea Posilicano</i>	
Spectral asymptotics for the Dirichlet Laplacian with a Neumann window via a Birman–Schwinger analysis of the Dirichlet-to-Neumann operator	315
<i>André Hänel and Timo Weidl</i>	
Dirichlet eigenfunctions in the cube, sharpening the Courant nodal inequality	353
<i>Bernard Helffer and Rola Kiwan</i>	
A mathematical modeling of electron–phonon interaction for small wave numbers close to zero	373
<i>Masao Hirokawa</i>	
The modified unitary Trotter–Kato and Zeno product formulas revisited	401
<i>Takashi Ichinose</i>	
Spectral asymptotics induced by approaching and diverging planar circles	419
<i>Sylwia Kondej</i>	
Spectral estimates for the Heisenberg Laplacian on cylinders	433
<i>Hynek Kovařík, Bartosch Ruzzkowski, and Timo Weidl</i>	

Contents	XIII
Variational proof of the existence of eigenvalues for star graphs <i>Konstantin Pankrashkin</i>	447
On the boundedness and compactness of weighted Green operators of second-order elliptic operators <i>Yehuda Pinchover</i>	459
Abstract graph-like spaces and vector-valued metric graphs <i>Olaf Post</i>	491
A Cayley–Hamilton theorem for periodic finite band matrices <i>Barry Simon</i>	525
Path topology dependence of adiabatic time evolution <i>Atushi Tanaka and Taksu Cheon</i>	531
On quantum graph filters with flat passbands <i>Ondřej Turek</i>	543
Comments on the Chernoff \sqrt{n}-lemma <i>Valentin A. Zagrebnov</i>	565
List of contributors	575
