

# Contents

<b>Preface</b>	v
Fritz Gesztesy, Harald Hanche-Olsen, Espen R. Jacobsen, Yurii Lyubarskii, Nils Henrik Risebro, and Kristian Seip	
<b>By such fate of signs</b>	1
Poul G. Hjorth	
<b>Optimal control of forward-backward stochastic Volterra equations</b>	3
Nacira Agram, Bernt Øksendal, and Samia Yakhlef	
<b>A unified approach to infinite dimensional integrals of probabilistic and oscillatory type with applications to Feynman path integrals</b>	37
Sergio Albeverio and Sonia Mazzucchi	
<b>The numbers lead a dance</b>	55
Alan R. Champneys, Poul G. Hjorth, and Harry Man	
<b>Compensated compactness in Banach spaces and weak rigidity of isometric immersions of manifolds</b>	73
Gui-Qiang G. Chen and Siran Li	
<b>The initial-boundary-value problem for an Ostrovsky–Hunter type equation</b>	97
Giuseppe Maria Coclite, Lorenzo di Ruvo, and Kenneth Hvistendahl Karlsen	
<b>Modeling crowd dynamics through hyperbolic – elliptic equations</b>	111
Rinaldo M. Colombo, Maria Gokiel, and Massimiliano D. Rosini	
<b>On the well-posedness of solutions with finite energy for nonlocal equations of porous medium type</b>	129
Félix del Teso, Jørgen Endal, and Espen R. Jakobsen	
<b>On the spectrum of leaky surfaces with a potential bias</b>	169
Pavel Exner	

<b>On the decay of almost periodic solutions of anisotropic degenerate parabolic-hyperbolic equations</b>	183
Hermano Frid	
<b>Factorizations and Hardy–Rellich-type inequalities</b>	207
Fritz Gesztesy and Lance Littlejohn	
<b>Symmetries and multipeakon solutions for the modified two-component Camassa–Holm system</b>	227
Katrin Grunert and Xavier Raynaud	
<b>Vanishing viscosity solutions of Riemann problems for models of polymer flooding</b>	261
Graziano Guerra and Wen Shen	
<b>Efficient computation of all speed flows using an entropy stable shock-capturing space-time discontinuous Galerkin method</b>	287
Andreas Hildebrand and Siddhartha Mishra	
<b>Dispersion estimates for spherical Schrödinger equations with critical angular momentum</b>	319
Markus Holzleitner, Aleksey Kostenko, and Gerald Teschl	
<b>Sixty years of moments for random matrices</b>	349
Werner Kirsch and Thomas Kriecherbauer	
<b>Bound states of Schrödinger type operators with Heisenberg sub-Laplacian</b>	381
Ari Laptev and Andrei Velicu	
<b>On Holden’s seven guidelines for scientific computing and development of open-source community software</b>	389
Knut-Andreas Lie	
<b>Sharp uniqueness results for discrete evolutions</b>	423
Yurii Lyubarskii and Eugenia Malinnikova	
<b>Spatial analyticity of solutions to nonlinear dispersive PDE</b>	437
Sigmund Selberg	
Publications by Helge Holden	455
