Preface	xi
Chapter 1. Beginnings	1
§1.1. Introduction	1
§1.2. An informal history of configurations	8
§1.3. Basic concepts and definitions	14
§1.4. Tools for the study of configurations	26
§1.5. Symmetry	32
§1.6. Reduced Levi graphs	38
§1.7. Derived figures and other tools	47
Chapter 2. 3-Configurations	59
§2.0. Overview	59
§2.1. Existence of 3-configurations	60
§2.2. Enumeration of 3-configurations (Part 1)	69
§2.3. Enumeration of 3-configurations (Part 2)	81
§2.4. General constructions for combinatorial 3-configurations	89
§2.5. Steinitz's theorem—the combinatorial part	92
§2.6. Steinitz's theorem—the geometric part	102
§2.7. Astral 3-configurations with cyclic symmetry group	110
§2.8. Astral 3-configurations with dihedral symmetry group	121
§2.9. Multiastral 3-configurations	134
§2.10. Duality of astral 3-configurations	144
§2.11. Open problems (and a few exercises)	150

Chapter 3. 4-Configurations	155
§3.0. Overview	155
§3.1. Combinatorial 4-configurations	156
§3.2. Existence of topological and geometric 4-configurations	161
§3.3. Constructions of geometric 4-configurations	169
§3.4. Existence of geometric 4-configurations	186
§3.5. Astral 4-configurations	190
§3.6. 2-Astral 4-configurations	203
§3.7. 3-Astral 4-configurations	212
§3.8. k -Astral configurations for $k \geq 4$	223
§3.9. Open problems	231
Chapter 4. Other Configurations	233
§4.0. Overview	233
§4.1. 5-configurations	234
§4.2. k -configurations for $k \geq 6$	239
§4.3. $[3, 4]$ - and $[4, 3]$ -configurations	242
§4.4. Unbalanced $[q, k]$ -configurations with $[q, k] \neq [3, 4]$	253
§4.5. Floral configurations	261
§4.6. Topological configurations	280
§4.7. Unconventional configurations	286
§4.8. Open problems	293
Chapter 5. Properties of Configurations	295
§5.0. Overview	295
§5.1. Connectivity of configurations	296
§5.2. Hamiltonian multilaterals	308
§5.3. Multilateral decompositions	322
§5.4. Multilateral-free configurations	327
§5.5. “Density” of trilaterals in configurations	342
§5.6. The dimension of a configuration	344
§5.7. Movable configurations	349
§5.8. Automorphisms and duality	359
§5.9. Open problems	374
Postscript	375
Appendix	377

The Euclidean, projective, and extended Euclidean planes	377
References	385
Index	397
