Preface	xi
Chapter 1. Introduction	1
§1.1. Topological spaces	1
§1.2. Measure and integration	8
§1.3. Exercises	21
Chapter 2. Normed spaces and operators	25
§2.1. Banach spaces	26
§2.2. Linear operators	39
§2.3. Hilbert spaces	45
§2.4. Convolutions and summability kernels	52
§2.5. The Riesz-Thorin interpolation theorem	59
§2.6. Applications to linear differential equations	63
§2.7. Exercises	69
Chapter 3. Fréchet spaces and Banach theorems	75
§3.1. Fréchet spaces	76
§3.2. Banach theorems	82
§3.3. Exercises	88
Chapter 4. Duality	93
§4.1. The dual of a Hilbert space	93
§4.2. Applications of the Riesz representation theorem	98
§4.3. The Hahn-Banach theorem	106

§4.4. Spectral theory of compact operators	114
§4.5. Exercises	122
Chapter 5. Weak topologies	127
§5.1. Weak convergence	127
§5.2. Weak and weak* topologies	128
§5.3. An application to the Dirichlet problem in the disc	132
§5.4. Exercises	138
Chapter 6. Distributions	143
§6.1. Test functions	144
§6.2. The distributions	146
§6.3. Differentiation of distributions	150
§6.4. Convolution of distributions	154
§6.5. Distributional differential equations	161
§6.6. Exercises	175
Chapter 7. Fourier transform and Sobolev spaces	181
§7.1. The Fourier integral	182
§7.2. The Schwartz class \mathcal{S}	186
§7.3. Tempered distributions	189
§7.4. Fourier transform and signal theory	195
§7.5. The Dirichlet problem in the half-space	200
§7.6. Sobolev spaces	206
§7.7. Applications	213
§7.8. Exercises	222
Chapter 8. Banach algebras	227
§8.1. Definition and examples	228
§8.2. Spectrum	229
§8.3. Commutative Banach algebras	234
§8.4. C^* -algebras	238
§8.5. Spectral theory of bounded normal operators	241
§8.6. Exercises	250
Chapter 9. Unbounded operators in a Hilbert space	257
§9.1. Definitions and basic properties	258
§9.2. Unbounded self-adjoint operators	262

§9.3. Spectral representation of unbounded self-adjoint operators	273
§9.4. Unbounded operators in quantum mechanics	277
§9.5. Appendix: Proof of the spectral theorem	287
§9.6. Exercises	295
Hints to exercises	299
Bibliography	321
Index	325
