Preface	xvii
<b>Part 1. The Language of Categories</b>	
Chapter 1. Categories and Functors	3
§1.1. Diagrams	3
§1.2. Categories	5
§1.3. Functors	7
§1.4. Natural Transformations	11
§1.5. Duality	14
§1.6. Products and Sums	15
§1.7. Initial and Terminal Objects	18
§1.8. Group and Cogroup Objects	21
§1.9. Homomorphisms	24
§1.10. Abelian Groups and Cogroups	25
§1.11. Adjoint Functors	26
Chapter 2. Limits and Colimits	29
§2.1. Diagrams and Their Shapes	29
§2.2. Limits and Colimits	31
§2.3. Naturality of Limits and Colimits	34
§2.4. Special Kinds of Limits and Colimits	35
§2.5. Formal Properties of Pushout and Pullback Squares	40

## Part 2. Semi-Formal Homotopy Theory

Chapter 3. Categories of Spaces	45
§3.1. Spheres and Disks	45
§3.2. CW Complexes	46
§3.3. Example: Projective Spaces	51
§3.4. Topological Spaces	53
§3.5. The Category of Pairs	58
§3.6. Pointed Spaces	60
§3.7. Relating the Categories of Pointed and Unpointed Spaces	63
§3.8. Suspension and Loop	66
§3.9. Additional Problems and Projects	68
Chapter 4. Homotopy	69
§4.1. Homotopy of Maps	69
§4.2. Constructing Homotopies	74
§4.3. Homotopy Theory	80
§4.4. Groups and Cogroups in the Homotopy Category	84
§4.5. Homotopy Groups	87
§4.6. Homotopy and Duality	89
§4.7. Homotopy in Mapping Categories	91
§4.8. Additional Problems	98
Chapter 5. Cofibrations and Fibrations	99
§5.1. Cofibrations	100
§5.2. Special Properties of Cofibrations of Spaces	104
§5.3. Fibrations	107
§5.4. Factoring through Cofibrations and Fibrations	110
§5.5. More Homotopy Theory in Categories of Maps	115
§5.6. The Fundamental Lifting Property	118
§5.7. Pointed Cofibrations and Fibrations	122
§5.8. Well-Pointed Spaces	124
§5.9. Exact Sequences, Cofibers and Fibers	129
§5.10. Mapping Spaces	133
§5.11. Additional Topics, Problems and Projects	136
Chapter 6. Homotopy Limits and Colimits	143
§6.1. Homotopy Equivalence in Diagram Categories	144

---

§6.2.	Cofibrant Diagrams	146
§6.3.	Homotopy Colimits of Diagrams	151
§6.4.	Constructing Cofibrant Replacements	155
§6.5.	Examples: Pushouts, $3 \times 3$ s and Telescopes	160
§6.6.	Homotopy Limits	167
§6.7.	Functors Applied to Homotopy Limits and Colimits	173
§6.8.	Homotopy Colimits of More General Diagrams	176
§6.9.	Additional Topics, Problems and Projects	178
Chapter 7.	Homotopy Pushout and Pullback Squares	181
§7.1.	Homotopy Pushout Squares	181
§7.2.	Recognition and Completion	185
§7.3.	Homotopy Pullback Squares	188
§7.4.	Manipulating Squares	190
§7.5.	Characterizing Homotopy Pushout and Pullback Squares	195
§7.6.	Additional Topics, Problems and Projects	196
Chapter 8.	Tools and Techniques	199
§8.1.	Long Cofiber and Fiber Sequences	199
§8.2.	The Action of Paths in Fibrations	203
§8.3.	Every Action Has an Equal and Opposite Coaction	205
§8.4.	Mayer-Vietoris Sequences	209
§8.5.	The Operation of Paths	211
§8.6.	Fubini Theorems	212
§8.7.	Iterated Fibers and Cofibers	214
§8.8.	Group Actions	216
Chapter 9.	Topics and Examples	221
§9.1.	Homotopy Type of Joins and Products	221
§9.2.	H-Spaces and co-H-Spaces	225
§9.3.	Unitary Groups and Their Quotients	230
§9.4.	Cone Decompositions	237
§9.5.	Introduction to Phantom Maps	245
§9.6.	G. W. Whitehead's Homotopy Pullback Square	249
§9.7.	Lusternik-Schnirelmann Category	250
§9.8.	Additional Problems and Projects	258

---

Chapter 10. Model Categories	261
§10.1. Model Categories	262
§10.2. Left and Right Homotopy	266
§10.3. The Homotopy Category of a Model Category	268
§10.4. Derived Functors and Quillen Equivalence	268
§10.5. Homotopy Limits and Colimits	270
<b>Part 3. Four Topological Inputs</b>	
Chapter 11. The Concept of Dimension in Homotopy Theory	275
§11.1. Induction Principles for CW Complexes	276
§11.2. $n$ -Equivalences and Connectivity of Spaces	277
§11.3. Reformulations of $n$ -Equivalences	280
§11.4. The J. H. C. Whitehead Theorem	286
§11.5. Additional Problems	286
Chapter 12. Subdivision of Disks	289
§12.1. The Seifert-Van Kampen Theorem	289
§12.2. Simplices and Subdivision	295
§12.3. The Connectivity of $X_n \hookrightarrow X$	298
§12.4. Cellular Approximation of Maps	299
§12.5. Homotopy Colimits and $n$ -Equivalences	300
§12.6. Additional Problems and Projects	303
Chapter 13. The Local Nature of Fibrations	305
§13.1. Maps Homotopy Equivalent to Fibrations	306
§13.2. Local Fibrations Are Fibrations	308
§13.3. Gluing Weak Fibrations	310
§13.4. The First Cube Theorem	313
Chapter 14. Pullbacks of Cofibrations	317
§14.1. Pullbacks of Cofibrations	317
§14.2. Pullbacks of Well-Pointed Spaces	319
§14.3. The Second Cube Theorem	320
Chapter 15. Related Topics	323
§15.1. Locally Trivial Bundles	323
§15.2. Covering Spaces	326
§15.3. Bundles Built from Group Actions	330

---

§15.4.	Some Theory of Fiber Bundles	333
§15.5.	Serre Fibrations and Model Structures	336
§15.6.	The Simplicial Approach to Homotopy Theory	341
§15.7.	Quasifibrations	346
§15.8.	Additional Problems and Projects	348
<b>Part 4. Targets as Domains, Domains as Targets</b>		
Chapter 16.	Constructions of Spaces and Maps	353
§16.1.	Skeleta of Spaces	354
§16.2.	Connectivity and CW Structure	357
§16.3.	Basic Obstruction Theory	359
§16.4.	Postnikov Sections	361
§16.5.	Classifying Spaces and Universal Bundles	363
§16.6.	Additional Problems and Projects	371
Chapter 17.	Understanding Suspension	373
§17.1.	Moore Paths and Loops	373
§17.2.	The Free Monoid on a Topological Space	376
§17.3.	Identifying the Suspension Map	379
§17.4.	The Freudenthal Suspension Theorem	382
§17.5.	Homotopy Groups of Spheres and Wedges of Spheres	383
§17.6.	Eilenberg-Mac Lane Spaces	384
§17.7.	Suspension in Dimension 1	387
§17.8.	Additional Topics and Problems	389
Chapter 18.	Comparing Pushouts and Pullbacks	393
§18.1.	Pullbacks and Pushouts	393
§18.2.	Comparing the Fiber of $f$ to Its Cofiber	396
§18.3.	The Blakers-Massey Theorem	398
§18.4.	The Delooping of Maps	402
§18.5.	The $n$ -Dimensional Blakers-Massey Theorem	405
§18.6.	Additional Topics, Problems and Projects	409
Chapter 19.	Some Computations in Homotopy Theory	413
§19.1.	The Degree of a Map $S^n \rightarrow S^n$	414
§19.2.	Some Applications of Degree	417
§19.3.	Maps Between Wedges of Spheres	421

---

§19.4. Moore Spaces	424
§19.5. Homotopy Groups of a Smash Product	427
§19.6. Smash Products of Eilenberg-Mac Lane Spaces	429
§19.7. An Additional Topic and Some Problems	432
Chapter 20. Further Topics	435
§20.1. The Homotopy Category Is Not Complete	435
§20.2. Cone Decompositions with Respect to Moore Spaces	436
§20.3. First $p$ -Torsion Is a Stable Invariant	438
§20.4. Hopf Invariants and Lusternik-Schnirelmann Category	445
§20.5. Infinite Symmetric Products	448
§20.6. Additional Topics, Problems and Projects	452
 <b>Part 5. Cohomology and Homology</b>	
Chapter 21. Cohomology	459
§21.1. Cohomology	459
§21.2. Basic Computations	467
§21.3. The External Cohomology Product	473
§21.4. Cohomology Rings	475
§21.5. Computing Algebra Structures	479
§21.6. Variation of Coefficients	485
§21.7. A Simple Künneth Theorem	487
§21.8. The Brown Representability Theorem	489
§21.9. The Singular Extension of Cohomology	494
§21.10. An Additional Topic and Some Problems and Projects	495
Chapter 22. Homology	499
§22.1. Homology Theories	499
§22.2. Examples of Homology Theories	505
§22.3. Exterior Products and the Künneth Theorem for Homology	508
§22.4. Coalgebra Structure for Homology	509
§22.5. Relating Homology to Cohomology	510
§22.6. H-Spaces and Hopf Algebras	512
Chapter 23. Cohomology Operations	515
§23.1. Cohomology Operations	516
§23.2. Stable Cohomology Operations	518

---

§23.3. Using the Diagonal Map to Construct Cohomology Operations	521
§23.4. The Steenrod Reduced Powers	525
§23.5. The Ádem Relations	528
§23.6. The Algebra of the Steenrod Algebra	533
§23.7. Wrap-Up	538
Chapter 24. Chain Complexes	541
§24.1. The Cellular Complex	542
§24.2. Applying Algebraic Universal Coefficients Theorems	547
§24.3. The General Künneth Theorem	548
§24.4. Algebra Structures on $C^*(X)$ and $C_*(X)$	550
§24.5. The Singular Chain Complex	551
Chapter 25. Topics, Problems and Projects	553
§25.1. Algebra Structures on $\mathbb{R}^n$ and $\mathbb{C}^n$	553
§25.2. Relative Cup Products	554
§25.3. Hopf Invariants and Hopf Maps	556
§25.4. Some Homotopy Groups of Spheres	563
§25.5. The Borsuk-Ulam Theorem	565
§25.6. Moore Spaces and Homology Decompositions	567
§25.7. Finite Generation of $\pi_*(X)$ and $H_*(X)$	570
§25.8. Surfaces	572
§25.9. Euler Characteristic	573
§25.10. The Künneth Theorem via Symmetric Products	576
§25.11. The Homology Algebra of $\Omega\Sigma X$	576
§25.12. The Adjoint $\lambda_X$ of $\text{id}_{\Omega X}$	577
§25.13. Some Algebraic Topology of Fibrations	579
§25.14. A Glimpse of Spectra	580
§25.15. A Variety of Topics	581
§25.16. Additional Problems and Projects	585
 <b>Part 6. Cohomology, Homology and Fibrations</b>	
Chapter 26. The Wang Sequence	591
§26.1. Trivialization of Fibrations	591
§26.2. Orientable Fibrations	592
§26.3. The Wang Cofiber Sequence	593

---

§26.4.	Some Algebraic Topology of Unitary Groups	597
§26.5.	The Serre Filtration	600
§26.6.	Additional Topics, Problems and Projects	603
Chapter 27.	Cohomology of Filtered Spaces	605
§27.1.	Filtered Spaces and Filtered Groups	606
§27.2.	Cohomology and Cone Filtrations	612
§27.3.	Approximations for General Filtered Spaces	615
§27.4.	Products in $E_1^{*,*}(X)$	618
§27.5.	Pointed and Unpointed Filtered Spaces	620
§27.6.	The Homology of Filtered Spaces	620
§27.7.	Additional Projects	621
Chapter 28.	The Serre Filtration of a Fibration	623
§28.1.	Identification of $E_2$ for the Serre Filtration	623
§28.2.	Proof of Theorem 28.1	625
§28.3.	External and Internal Products	631
§28.4.	Homology and the Serre Filtration	633
§28.5.	Additional Problems	633
Chapter 29.	Application: Incompressibility	635
§29.1.	Homology of Eilenberg-Mac Lane Spaces	636
§29.2.	Reduction to Theorem 29.1	636
§29.3.	Proof of Theorem 29.2	638
§29.4.	Consequences of Theorem 29.1	641
§29.5.	Additional Problems and Projects	642
Chapter 30.	The Spectral Sequence of a Filtered Space	645
§30.1.	Approximating $\text{Gr}^s \tilde{H}^n(X)$ by $E_r^{s,n}(X)$	646
§30.2.	Some Algebra of Spectral Sequences	651
§30.3.	The Spectral Sequences of Filtered Spaces	654
Chapter 31.	The Leray-Serre Spectral Sequence	659
§31.1.	The Leray-Serre Spectral Sequence	659
§31.2.	Edge Phenomena	663
§31.3.	Simple Computations	671
§31.4.	Simplifying the Leray-Serre Spectral Sequence	673
§31.5.	Additional Problems and Projects	679

---

Chapter 32. Application: Bott Periodicity	681
§32.1. The Cohomology Algebra of $BU(n)$	682
§32.2. The Torus and the Symmetric Group	682
§32.3. The Homology Algebra of $BU$	685
§32.4. The Homology Algebra of $\Omega SU(n)$	689
§32.5. Generating Complexes for $\Omega SU$ and $BU$	690
§32.6. The Bott Periodicity Theorem	692
§32.7. $K$ -Theory	695
§32.8. Additional Problems and Projects	698
Chapter 33. Using the Leray-Serre Spectral Sequence	699
§33.1. The Zeeman Comparison Theorem	699
§33.2. A Rational Borel-Type Theorem	702
§33.3. Mod 2 Cohomology of $K(G, n)$	703
§33.4. Mod $p$ Cohomology of $K(G, n)$	706
§33.5. Steenrod Operations Generate $\mathcal{A}_p$	710
§33.6. Homotopy Groups of Spheres	711
§33.7. Spaces Not Satisfying the Ganea Condition	713
§33.8. Spectral Sequences and Serre Classes	714
§33.9. Additional Problems and Projects	716
<b>Part 7. Vistas</b>	
Chapter 34. Localization and Completion	721
§34.1. Localization and Idempotent Functors	722
§34.2. Proof of Theorem 34.5	726
§34.3. Homotopy Theory of $\mathcal{P}$ -Local Spaces	729
§34.4. Localization with Respect to Homology	734
§34.5. Rational Homotopy Theory	737
§34.6. Further Topics	742
Chapter 35. Exponents for Homotopy Groups	745
§35.1. Construction of $\alpha$	747
§35.2. Spectral Sequence Computations	751
§35.3. The Map $\gamma$	754
§35.4. Proof of Theorem 35.3	754
§35.5. Nearly Trivial Maps	756

---

Chapter 36. Classes of Spaces	759
§36.1. A Galois Correspondence in Homotopy Theory	760
§36.2. Strong Resolving Classes	761
§36.3. Closed Classes and Fibrations	764
§36.4. The Calculus of Closed Classes	767
Chapter 37. Miller's Theorem	773
§37.1. Reduction to Odd Spheres	774
§37.2. Modules over the Steenrod Algebra	777
§37.3. Massey-Peterson Towers	780
§37.4. Extensions and Consequences of Miller's Theorem	785
Appendix A. Some Algebra	789
§A.1. Modules, Algebras and Tensor Products	789
§A.2. Exact Sequences	794
§A.3. Graded Algebra	795
§A.4. Chain Complexes and Algebraic Homology	798
§A.5. Some Homological Algebra	799
§A.6. Hopf Algebras	803
§A.7. Symmetric Polynomials	806
§A.8. Sums, Products and Maps of Finite Type	807
§A.9. Ordinal Numbers	808
Bibliography	811
Index of Notation	821
Index	823
