
Index

- Ablowitz-Ladik equation, 170, 173
- additive RHP, 103
- airplane boarding, 65
- Airy function, 5, 155
- Airy kernel, 155
- alternant, 269
- ancestor, 83
- arc-length measure, 112
- Aztec diamond, 12, 317

- ballot sequence, 50
- Bertrand's ballot problem, 55
- Bessel function, 187
- Beurling weights, 132
- Brownian bridge, 61
- Brownian Dyson process, 380
- Brownian motion, 379
- bumped, 29

- Cauchy operator, 103
- Cauchy's identity, 271
- ∂C_p , 115
- Chebyshev polynomial of the first kind, 99
- Chebyshev polynomial of the second kind, 99
- Christoffel-Darboux formula, 99
- class function, 141
- col, 275
- composition, 256
- conjugacy class, 87
- correlation function, 142, 150
- correlation kernel, 16, 313

- curve, 112
- cycle, 88

- de-Poissonization lemma, 21
- decreasing subsequence, 2
- descendent, 83
- determinantal formula of F_λ , 49
- determinantal point process, 16, 152, 205
- Dickman distribution, 94
- directed last passage percolation, 277
- directed path, 276
- discrete Painlevé II equation, 170
- $d_k(\pi)$ = length of the longest k -decreasing subsequence of π , 41
- down/right path, 276
- droplet initial condition, 72
- Dyson process, 379

- energy minimization problem, 153
- equilibrium measure, 153
- exponential specialization, 267

- Ferrer's diagram = Young diagram, 9
- Fredholm expansion, 152

- gap probability, 142, 146
- Gaussian unitary ensemble, 8, 140
- Gegenbauer polynomial, 99
- generalized permutation, 273
- generator, 442
- Geronimus relations, 177
- Gessel's formula, 17, 165
- greedy strategy, 63

- Greene, theorem, 42
 GUE = Gaussian unitary ensemble, 8, 140
- Hahn polynomial, 100
 Hankel determinant, 96
 Hardy space, 131
 Heine formula, 96
 Helton-Howe formula, 199
 Hermite polynomial, 99
 Hermitian self-dual matrix, 379
 $H^{1/2}(\Sigma)$, 191
 Hilbert transform, 114
 hook formula, 61
 hook length, 61
- iid=independent and identically distributed, 280
 $i_k(\pi)$ = length of the longest k -increasing subsequence of π , 41
 increasing subsequence, 2
 inner corners of partition, 31
 insertion tableau, 32
 integrable operator, 118
 integrating out lemma, 152
 Ito's formula, 383
- Jacobi operator, 98
 Jacobi polynomial, 99
 Jacobi-Trudi identities for Schur functions, 260
 Jordan curve, 117
 jump matrix, 100
- k -decreasing subsequence, 41
 k -increasing subsequence, 41
 Karlin-McGregor formula, 57, 404
 Kolmogorov backward equation, 442
 Kolmogorov forward equation, 442
 Krawtchouk polynomial, 100
- Laguerre polynomial, 99
 last passage time, 277
 Legendre polynomial, 99
 length of partition, 9
 level repulsion, 142
 line integral, 113
 local martingale, 441
 longest increasing subsequence, 2
- Markov property, 404
 Markov semi-group, 396
 martingale, 441
- matrix Brownian motion, 380
 matrix Ornstein-Uhlenbeck process, 379
 Meixner ensemble, 283
 Meixner polynomial, 100
 monic orthogonal polynomial, 95
- $\mathbb{N}_0 = \{0, 1, 2, \dots\}$, 130
 nonintersecting paths, 16
 nonintersecting Poisson processes, 56
 norm, 113
 normalized RHP, 115
- one-line notation of permutation, 28
 OP = orthogonal polynomial, 95
 OPBS = order preserving ballot sequence, 51
 opposite orientation, 113
 OPRL = orthogonal polynomials on the real line, 95
 order preserving ballot sequence, 51
 orthogonal polynomial, 95
 OUPC=orthogonal polynomial on the unit circle, 106
 outer corners of partition, 31
- P -tableau, 33
 Painlevé II equation, 6
 Painlevé III equation, 170
 partial permutation, 42
 partial tableau, 28
 particle-antiparticle model, 75
 partition, 9
 partition function, 97
 patience sorting, 63
 Pauli matrix, 108
 Plancherel measure, 11, 17
 Plancherel-Rotach asymptotics, 154
 Plemelji formula, 117
 PNG = polynuclear growth model, 71
 Poisson process, 20
 Poisson-Charlier polynomial, 99
 Poisson-Dirichlet distribution, 94
 Poissonization, 3, 17, 19
 Polish space, 92, 396
 polynuclear growth model, 71
 PT = partial tableau, 28
- Q -tableau, 33
- random matrix theory, 1
 recording tableau, 32
 reflection coefficient, 178
 resolvent formula, 119

- reversal of permutation, 34
 reverse polynomial, 107
 reversible Markov process, 396
 RHP = Riemann-Hilbert problem, 100
 RHP; precise sense, 115
 Riemann-Hilbert problem, 1, 100
 RMT = random matrix theory, 1
 Robinson-Schensted algorithm, 28
 Robinson-Schensted-Knuth, 1, 273
 row, 275
 row insertion, 29
 RS = Robinson-Schensted, 33
 RSK = Robinson-Schensted-Knuth, 1, 273

 same orientation, 113
 Schützeberger theorem, 35
 Schensted theorem, 33
 Schur measure, 17, 272
 $\mathbb{P}^{\text{Schur}}$, 272
 Schwartz space, 102
 semi-infinite Toeplitz matrix, 130
 semi-standard Young tableau, 257
 sgn, 135
 show lines, 44
 skew 2-tensor, 395
 Skorohod representation theorem, 92
 soliton, 177
 SOPBS = strictly order preserving ballot sequence, 52
 spherical polynomial, 99
 SSYT = semi-standard Young tableau, 257
 standard Young tableau, 9
 stationary Markov process, 397
 steepest-descent method, 122, 431
 steepest-descent method for RHP's, 122
 stochastic differential equation, 442
 strictly order preserving ballot sequence, 52
 strong Markov process, 57
 strong Szegő limit theorem, 121
 symbol of Toeplitz matrix, 110
 SYT_N = the set of all standard Young tableaux of size N , 9
 SYT = standard Young tableau, 9
 Szegő limit theorem, 17
 Szegő recurrence relation, 109

 TASEP = totally asymmetric simple exclusion process, 301

 Tchebichef polynomial of the first kind, 99
 Tchebichef polynomial of the second kind, 99
 three-term recurrence relation, 98
 Toda flow, 177
 Today lattice, 170
 Toeplitz determinant, 110
 Toeplitz matrix, 17, 110
 Toeplitz operator, 130
 Tracy-Widom distribution, 6, 157
 transition probability of Young diagrams Markov chain, 84
 transposition of SYT, 34
 two-line notation of permutation, 28
 type, 273

 Ulam's problem, 3
 ultraspherical polynomial, 99
 unitary ensemble, 140
 up/right path, 2, 19, 253, 278

 Vandermonde determinant, 96, 142, 269
 varying weight, 153
 Verblunsky coefficient, 109
 vicious walker model, 68
 Viennot corollary, 47

 weakly increasing subsequence, 273
 Weyl chamber, 57
 Wiener algebra, 131
 Wigner distribution, 153
 winding number, 122
 Wishart ensemble, 285

 \mathcal{Y}_N = the set of all Young diagrams of size N , 9
 Young diagram, 9
 Young tableau, 9

 $[x]$, 82
