
Index

- ADM energy-momentum, 225, 257
- ADM mass, 68, 72–74, 91, 226
- apparent horizon
 - in initial data sets, 228, 240, 245–247
 - Riemannian, 107, 109, 110, 112
- asymptotically flat, 66
 - initial data sets, 225
- axisymmetric, 81, 220

- background metric, 12
- Bartnik mass, 182
- Bianchi identities, 11, 12
- black hole, 228
- Bochner formula, *see also* Weitzenböck formula
- Bondi mass, *see also* Trautman-Bondi mass
- boost, 209
- Bray flow, 142
- Brown-York mass, 197

- Cauchy hypersurface, 213
- causal, 211
- causal future, 211
- causal structure, 211
- Clifford algebra, 161
- coframe, 4
- conformal, 21
- conformal Laplacian, 22
- conformally flat, 77, 83
- constraint equations, 221
- constraint operator, 285
 - modified, 296

- cosmic censorship, 238

- d.o.c., *see also* domain of outer communication
- DEC, *see also* dominant energy condition
- deformation vector field, 27
- density theorem
 - for DEC, 295
 - for vacuum initial data, 292
 - nonnegative scalar curvature case, 101
 - scalar-flat case, 89
- Dirac operator, 166
- divergence, 9, 25
- divergence theorem, 10
- domain of outer communication, 228
- dominant energy condition, 222, 223

- Einstein constraint equations, *see also* constraint equations
- Einstein equations, *see also* Einstein field equations
- Einstein field equations, 214
- Einstein tensor, 12
- Einstein-Hilbert action, 216
- elliptic estimates, 303, 304
- enclosed region, 109
- enclosing, 109
- enclosing boundary, 109
- exceptional set, 316

- first variation of mean curvature, 32
- first variation of volume, 28, 29, 32

- frame, 4
 Fredholm, 306
 Fredholm index, *see also* index

 Gauss curvature, 12
 Gauss equation, 25, 26
 Gauss-Bonnet Theorem, 17
 Gauss-Codazzi equations, 25
 Geroch monotonicity, 123, 132
 globally hyperbolic, 213
 graphical hypersurfaces, 78, 119

 Hölder inequality, 320
 harmonic functions, 10, 315
 harmonic polynomial, 315
 Hawking area theorem, 240
 Hawking mass, 121
 Hodge Laplacian, 186
 Hopf maximum principle, *see also*
 maximum principle

 index, 306
 index form, 15
 initial data set, 223
 inverse mean curvature flow, 121, 123,
 125
 isotopic, 27

 Kähler, 84
 Kelvin transform, 318
 Kerr spacetime, 220
 Killing field, 8
 Krein-Rutman Theorem, 310
 Kruskal-Szekeres, 219

 Laplace-Beltrami operator, 10
 Laplacian, 10
 Legendre polynomials, 317
 Levi-Civita connection, 8
 Lichnerowicz formula, *see also*
 Schrödinger-Lichnerowicz formula
 Lie derivative, 7
 linearization, 26
 Lorentz transformations, 208
 Lorentzian, 207

 marginally outer trapped surface, 234,
 240
 maximum principle, 302
 mean curvature, 24
 min-max, 61
 minimal, 29
 minimizing hull, 109

 Minkowski space, 208
 MOTS, *see also* marginally outer
 trapped surface

 NEC, *see also* null energy condition
 null, 210
 null energy condition, 232
 null expansion, 230, 233
 null generators, 230
 null hypersurface, 213
 null second fundamental form, 233

 outermost minimal hypersurface, 109
 outward minimizing, 109

 Penrose incompleteness, 234
 Penrose inequality, 113, 121, 249
 perimeter, 109
 Peterson-Codazzi-Mainardi equation, 25
 Poincaré group, 209
 Poisson kernel, 317
 principal eigenfunction, 307
 principal eigenvalue, 307

 quasi-local mass, 121

 Raychaudhuri equation, 231
 Rayleigh quotients, 308
 Rellich-Kondrachov compactness, 321
 Riccati equation, 231, 232
 Ricci curvature, 12
 Ricci flow, 48, 97, 104, 117
 Riemann curvature tensor, 11
 Riemannian case, *see also*
 time-symmetric

 scalar curvature, 12, 14, 17
 Schrödinger-Lichnerowicz formula, 166,
 277
 Schwarzschild
 space, 63, 66
 spacetime, 217
 second fundamental form, 23
 null, 230
 second variation of volume, 31–33, 35
 sectional curvature, 12
 shape operator, 23
 null, 230
 shear scalar, 231
 Sobolev embedding, 320
 spacelike, 210
 spacelike hypersurface, 213
 spacetime, 211

- special relativity, 208
- spectral theorem, 313
- spherical harmonics, 315
- spherically symmetric, 63, 77, 251
- spinor, 164
- spinors, 161
- stability inequality, 33, 34
- stability operator
 - for minimal hypersurfaces, 33
 - for MOTS, 243
- stable
 - minimal submanifold, 33
 - MOTS, 243
- static, 214
- stationary, 220
- stress-energy tensor, 214
- strong maximum principle, *see also*
 - maximum principle

- time-symmetric, 225
- timelike, 210
- timelike hypersurface, 213
- trapped surface, 234
- Trautman-Bondi mass, 250
- two-sided, 24

- uniformization theorem, 21

- vacuum, 216, 223
 - static, 184, 218

- Wang-Yau mass, 198
- Weitzenböck formula, 48, 96, 185
- Weyl tensor, 83
- Willmore inequality, 122

- Yamabe positive, 18
- Yamabe problem, 21

- zonal harmonic, 317
