Preface	ix
Chapter 1. First Examples and General Properties of Subshifts	1
§1.1. Symbol Sequences and Subshifts	1
§1.2. Word-Complexity	5
§1.3. Transitive and Synchronized Subshifts	9
§1.4. Sliding Block Codes	10
§1.5. Word-Frequencies and Shift-Invariant Measures	12
§1.6. Symbolic Itineraries	14
Chapter 2. Topological Dynamics	19
§2.1. Basic Notions from Dynamical Systems	19
§2.2. Transitive and Minimal Systems	23
§2.3. Equicontinuous and Distal Systems	28
§2.4. Topological Entropy	36
§2.5. Mathematical Chaos	40
§2.6. Transitivity and Topological Mixing	44
§2.7. Shadowing and Specification	47
Chapter 3. Subshifts of Positive Entropy	51
§3.1. Subshifts of Finite Type	51
§3.2. Sofic Shifts	61
§3.3. Coded Subshifts	65
§3.4. Hereditary and Density Shifts	71

---

§3.5.	$\beta$ -Shifts and $\beta$ -Expansions	77
§3.6.	Unimodal Subshifts	88
§3.7.	Gap Shifts	117
§3.8.	Spacing Shifts	120
§3.9.	Power-Free Shifts	122
§3.10.	Dyck Shifts	128
Chapter 4.	Subshifts of Zero Entropy	133
§4.1.	Linear Recurrence	133
§4.2.	Substitution Shifts	135
§4.3.	Sturmian Subshifts	162
§4.4.	Interval Exchange Transformations	180
§4.5.	Toeplitz Shifts	185
§4.6.	$\mathcal{B}$ -Free Shifts	195
§4.7.	Unimodal Restrictions to Critical Omega-Limit Sets	203
Chapter 5.	Further Minimal Cantor Systems	217
§5.1.	Kakutani-Rokhlin Partitions	217
§5.2.	Cutting and Stacking	220
§5.3.	Enumeration Systems	225
§5.4.	Bratteli Diagrams and Vershik Maps	233
Chapter 6.	Methods from Ergodic Theory	257
§6.1.	Ergodicity	259
§6.2.	Birkhoff's Ergodic Theorem	260
§6.3.	Unique Ergodicity	262
§6.4.	Measure-Theoretic Entropy	282
§6.5.	Isomorphic Systems	284
§6.6.	Measures of Maximal Entropy	287
§6.7.	Mixing	295
§6.8.	Spectral Properties	309
§6.9.	Eigenvalues of Bratteli-Vershik Systems	325
Chapter 7.	Automata and Linguistic Complexity	341
§7.1.	Automata	341
§7.2.	The Chomsky Hierarchy	345
§7.3.	Automatic Sequences and Cobham's Theorems	357

---

Chapter 8. Miscellaneous Background Topics	367
§8.1. Pisot and Salem Numbers	367
§8.2. Continued Fractions	376
§8.3. Uniformly Distributed Sequences	385
§8.4. Diophantine Approximation	391
§8.5. Density and Banach Density	395
§8.6. The Perron-Frobenius Theorem	398
§8.7. Countable Graphs and Matrices	401
Appendix. Solutions to Exercises	413
Bibliography	423
Index	451
