
Contents

Preface	vii
Chapter 1. Introduction	1
§1.1. The square torus	1
§1.2. The space of tori	2
§1.3. Dynamics	4
§1.4. Counting	6
Chapter 2. Three Definitions	9
§2.1. Polygons	9
§2.2. Geometric structures	18
§2.3. Holomorphic 1-forms	21
§2.4. Saddle connections and cylinders	26
§2.5. Equivalences	29
§2.6. Quadratic differentials	33
Chapter 3. Moduli Spaces of Translation Surfaces	39
§3.1. Teichmüller and moduli spaces	39
§3.2. Strata of translation surfaces	44
§3.3. Coordinates on components of strata	45
§3.4. Measures	46
§3.5. Components of strata	50
§3.6. Delaunay triangulations	52
§3.7. Finiteness of the MSV measure	59

Chapter 4. Dynamical Systems and Ergodic Theory	63
§4.1. Topological dynamics	63
§4.2. Ergodic theory	67
§4.3. Low genus examples	70
§4.4. Number of ergodic measures	81
§4.5. Interval exchange transformations	86
Chapter 5. Renormalization	95
§5.1. A criterion for unique ergodicity	95
§5.2. Ergodicity of the Teichmüller flow	100
§5.3. Geodesics, horocycles, and mixing	106
§5.4. Quantitative renormalization and ergodicity	109
§5.5. Nonunique ergodicity and Hausdorff dimension	119
Chapter 6. Counting and Equidistribution	123
§6.1. Lattice point counting	123
§6.2. Saddle connections and holonomy vectors	127
§6.3. Siegel-Veech transforms	128
§6.4. From counting to dynamics	129
§6.5. Equidistribution of circles	132
§6.6. Further counting results	136
§6.7. Counting and volumes	137
Chapter 7. Lattice Surfaces	141
§7.1. Affine diffeomorphisms and Veech groups	142
§7.2. Examples	144
§7.3. Cusps, cylinders, and shears	150
§7.4. Optimal dynamics	151
§7.5. Homogeneous dynamics	154
§7.6. Characterizations of lattice surfaces	156
§7.7. Classifying lattice surfaces	158
§7.8. Square-tiled surfaces	160
Conclusion	165
Bibliography	167
Index	177
