- adjoint representation, 4
- admissible, 277
- admissible reading, 157
- affine Cartan datum, 230
- affine crystal, 236
- affine dominant integral weight, 230
- affine Dynkin diagram, 230
- affine energy function, 235
- affine Kac-Moody algebra, 230
- affine type, 25, 26
- affine weight, 215, 230
- affine weight lattice, 230
- affinization, 216, 233
- algebra, 14
- antipode, 14, 17
- associative algebra, 14
- associativity condition, 14
  
- balanced triple, 120
- basic representation, 221, 263, 281
- Boltzmann weight, 210, 212
- bracket, 1
  
- canonical central element, 230
- Cartan datum, 22
  - classical, 232
- Cartan matrix, 9
- Cartan subalgebra, 21
  
- Casimir operator, 30
- category  $\mathcal{O}$ , 28, 43
- category  $\mathcal{O}_{\text{int}}$ , 31
- category  $\mathcal{O}_{\text{int}}^{\geq 0}$ , 152
- category  $\mathcal{O}_{\text{int}}^q$ , 45
- center, 23, 230
- central element, 230
- character, 28, 43
- character formula, 33, 54
- Chevalley involution, 23
- classical Cartan datum, 232
- classical crystal, 236
- classical dominant integral weight, 232
- classical limit, 52
- classical weight, 215, 232
- coalgebra, 15
  - cocommutative, 16
- coassociativity condition, 16
- cocommutative, 16
- combinatorial  $R$ -matrix, 236
- commutative algebra, 14
- comparable position, 157
- complete reducibility, 34, 59
- comultiplication, 13, 15, 17
- configuration, 209
- coroot, 22
- count, 15, 17
- crystal, 86
- crystal basis, 67
- crystal graph, 68
- crystal lattice, 67
- crystal limit, 67
- crystal morphism, 88
  
- deformation, 47, 54

- $\delta$ , 279
- $\delta$ -column, 279
- denominator identity, 33
- derived subalgebra, 23
- divided power, 46
- dominant integral weight, 32, 152
  - affine, 230
  - classical, 232
- dual weight lattice, 21, 229
- Dynkin diagram, 25, 150, 230
- embedding of crystals, 89
- energy function, 211, 235
- Euler-Poincaré principle, 27, 33
- evaluation module, 216, 233
- evaluation space, 211
- Far-Eastern reading, 156
- finite dual, 58
- finite type, 25, 26
- formal completion, 242
- free lattice, 119
- full column, 276
- fundamental weight, 22, 154, 170, 180, 182, 191, 197, 215, 229
- general linear Lie algebra, 2, 149
- general position, 217
- generalized Cartan matrix, 21
- generalized Young diagram, 193, 194, 204
- global basis, 122, 123
- ground-state configuration, 209
- ground-state path, 214, 253, 264
- ground-state wall, 270
- half-box, 177, 193, 200
- highest weight, 7, 12, 28, 44
- highest weight module, 7, 11, 12, 28, 43, 152
  - irreducible, 29, 45, 152
- highest weight vector, 7, 12, 28, 44
- homomorphism, 2, 15–17
- Hopf algebra, 13, 14, 17, 24, 39
- Hopf ideal, 17
- hyperbolic type, 26
- $i$ -admissible, 277
- $i$ -removable column, 277
- $i$ -signature, 85, 278
- ideal, 2
- indecomposable, 21
- indefinite, 25
- indent corner, 155
- integrable module, 31, 45
- integral form, 51
- involution, 23, 40
- irreducible highest weight module, 29, 45, 152
- irreducible module, 4, 7, 12, 55
- isomorphism
  - crystal, 89
  - crystal basis, 70
- Jacobi identity, 2
- Jacobi triple product identity, 33
- Kac-Moody algebra, 22
- Kashiwara operators, 65
- kernel, 2
- Kostant's formula, 27
- $\Lambda_0$ -path, 214
- $\lambda$ -path, 253
- Laurent polynomial, 119
- leading term, 244
- length, 22
- level, 230
- Lie algebra, 1
  - simple, 2
  - trivial, 2
- Lie group, 1
- Littlewood-Richardson rule, 203
- local basis, 122
- locally nilpotent, 30
- maximal realization, 22
- maximal toral subalgebra, 150
- maximal vector, 27, 43
- Middle-Eastern reading, 156
- minimal realization, 22
- modified root operator, 127
- module, 3
  - evaluation, 216, 233
  - highest weight, 7, 11, 12, 28, 43, 152
  - integrable, 31, 45
  - irreducible, 4, 7, 12, 29, 45, 55, 152
  - restricted, 30
  - tensor product of, 18
  - Verma, 8, 12, 28, 44, 57, 152

- morphism
  - crystal, 88
- multiplication, 14, 17
- multiplicity
  - root, 23
  - weight, 7, 11, 27, 43
- natural representation, 4, 11, 66
- negative root, 10
- null root, 215, 230, 279
- one-point function, 214
- 1-sector, 210
- partition function, 212

- path, 214, 253  
 path realization, 254  
 perfect crystal, 248  
 perfect representation, 248  
 Poincaré-Birkhoff-Witt Theorem, 5  
 positive root, 10, 22  
 positive root lattice, 22  
 proper, 276
- $q$ -binomial coefficient, 38  
 $q$ -integer, 38  
 $q$ -string, 217  
 quantized universal enveloping algebra, 38  
 quantum adjoint operator, 39  
 quantum affine algebra, 231, 232  
 quantum deformation, 37  
 quantum general linear algebra, 151  
 quantum group, 38  
 quantum Serre relation, 39  
 quantum special linear algebra, 180  
 quantum special orthogonal algebra, 170, 191, 198  
 quantum symplectic algebra, 182  
 quintuple product identity, 35  
 quotient, 17
- $R$ -matrix, 211, 218, 235, 236  
 reading, 156  
 realization, 22  
 reduced, 280  
 reduced expression, 22  
 removable, 277  
 removable  $i$ -block, 277  
 removable corner, 155  
 removable  $\delta$ , 280  
 representation, 3, 5, 18  
   tensor product of, 18  
 restricted dual, 57  
 restricted module, 30  
 root, 23  
 root lattice, 22, 150  
 root multiplicity, 23, 27  
 root space, 23, 24  
 root space decomposition, 6, 10, 23, 24, 38
- semiregular, 86  
 semistandard tableau, 155, 184, 194, 201  
 Serre relation, 9, 23  
   quantum, 39  
 simple coroot, 22, 229  
 simple Lie algebra, 2  
 simple reflection, 10, 22  
 simple root, 22, 150, 170, 180, 182, 191, 197, 229  
 6-vertex condition, 210  
 6-vertex model, 210  
 skew Young diagram, 155
- $\mathfrak{sl}_2(\mathbf{F})$ , 6  
 special linear Lie algebra, 3, 8, 150, 179  
 special orthogonal Lie algebra, 190, 197  
 spin, 209  
 spin representation, 175, 193, 199  
 strict crystal morphism, 88  
 strictly higher than, 157  
 string function, 222  
 subalgebra, 2  
 submodule, 3  
 Sweedler notation, 16  
 symmetrizable, 21  
 symplectic Lie algebra, 181
- tableau, 155, 184, 194, 201  
 tensor product, 15–18  
 tensor product rule, 77  
 transposition map, 14, 40  
 triangular decomposition, 6, 10, 23, 24, 40, 42, 123, 150, 151  
 trivial Lie algebra, 2, 5
- unit, 14, 17  
 universal enveloping algebra, 4, 24
- vector representation, 4, 11, 70, 152, 171, 181, 183, 192, 199  
 Verma module, 8, 12, 28, 44, 57, 152  
 vertex operator, 240, 243
- weight, 7, 11, 27, 43, 155, 270  
   dominant integral, 32, 152, 230, 232  
 weight configuration, 212  
 weight lattice, 21, 215  
   affine, 230  
   classical, 232  
 weight module, 7, 11, 27, 43, 152  
 weight multiplicity, 7, 11, 27, 43  
 weight sequence, 214  
 weight space, 7, 11, 27, 43, 50  
 weight space decomposition, 27, 31, 43, 44, 50, 52  
 weight vector, 27, 43  
 Weyl group, 10, 22  
 Weyl relation, 23  
 Weyl-Kac character formula, 33, 54
- Yang-Baxter equation, 211  
 Young diagram, 155  
 Young wall, 269, 276
- 0-sector, 210
