Foreword	vii
Chapter 1. Flows	1
§1.1. Flows and Orbits	1
§1.2. Topologically Conjugate Flows	8
§1.3. Topologically Equivalent Flows	10
§1.4. Invariant Sets	18
§1.5. Exercises	20
Chapter 2. Recurrent Points	23
§2.1. Fixed Points	24
§2.2. Periodic Points	28
§2.3. Limit Sets	38
§2.4. Poincaré Recurrent Points	51
§2.5. Nonwandering Points	56
§2.6. Central Points	64
§2.7. Chain Recurrent Points	69
§2.8. A Summary of Recurrent Sets and Their Properties	93
§2.9. Exercises	93
Chapter 3. Irreducible Sets	99
§3.1. Minimal Sets	99
§3.2. Topologically Transitive Sets	102
§3.3. Chain Transitive Sets	109

§3.4. Attracting Sets and Repelling Sets	118
§3.5. Exercises	133
Chapter 4. Test Functions	139
§4.1. Potential Functions on Euclidean Spaces and Surfaces	139
§4.2. Hamiltonian Functions	148
§4.3. Invariant Functions	161
§4.4. Weak and Strong Lyapunov Functions	162
§4.5. Potential Functions on Riemannian Manifolds	167
§4.6. Morse Functions	172
§4.7. Complete Lyapunov Functions	176
§4.8. The Fundamental Theorem of Dynamical Systems	178
§4.9. Exercises	191
Afterword	197
Appendix A. Discrete Dynamical Systems	201
Appendix B. Circle Rotations	205
Appendix C. The Hausdorff Metric	209
Bibliography	213
Index	217
