

TABLE OF CONTENTS

..... #

1. Preliminaries
 2. Structure Theory of Semisimple Rings
 3. Representation Theory of Finite Groups
 4. Representation Theory of the Symmetric Group
 5. Symmetric Polynomials
 6. Schur-Weyl Duality and the Relationship Between Representations of S_d and $GL_n(\mathbb{C})$
 7. Structure Theory of Complex Semisimple Lie Algebras
 8. Representation Theory of Complex Semisimple Lie Algebras
 9. Generalities on Algebraic Groups
 10. Structure Theory of Reductive Groups
 11. Representation Theory of Semisimple Algebraic Groups
 12. Geometry of the Grassmannian, Flag and their Schubert Varieties via Standard Monomial Theory
 13. Singular Locus of a Schubert Variety in the Flag Variety SL_n/B
 14. Applications.
- Appendix: Chevalley groups
