

Contents

Preface to the Second Edition	ix
Preface to the First Edition	xi
Early Life and Middle Years	1
Chapter 1. A Seed is Sown	3
Chapter 2. Approximation by Integrals of e^{-x^2}	11
Chapter 3. Impetus Provided by the Theory of Errors of Observation	21
Chapter 4. Impetus Provided by Mathematical Astronomy	31
Chapter 5. The Flowering of the Central Limit Theorem Begins	33
Chapter 6. The Development of the Hypothesis of Elementary Errors	39
Chapter 7. The Emergence of an Abstract Central Limit Theorem	45
Chapter 8. Chebyshev's Pupils: A. A. Markov and A. M. Lyapunov	53
Bibliography	67
The Modern Era	79
The Fundamental Limit Theorems in Probability W. FELLER	81
The Central Limit Theorem Around 1935 L. LECAM	115
Comments and Rejoinder H. F. TROTTER, J. L. DOOB, DAVID POLLARD, AND L. LECAM	139
Appendix	147
On a theorem in probability theory A. M. LYAPUNOV	149
On a theorem in probability theory A. M. LYAPUNOV	151

A general proposition in probability theory A. M. LYAPUNOV	173
A new form of a theorem on the limit of a probability A. M. LYAPUNOV	175
Index	193
