Foreword	xiii
Preface	xv
Introduction	xvii
Chapter One. The Beginning of Operations Analysis in the Eighth Air Force	1
Introduction	1
The Mobilization of Science in World War II	1
The Beginning of Operations Analysis in the United States Armed Forces	2
An Operational Research Section is Established in the Eighth Air Force	6
Operations Analysis and the Combined Bomber Offensive	8
Chapter Two. The Pioneer Operations Research Section Organizes, October–December 1942	19
General Eaker Issues Directives to the New ORS	19
ORS Produces its First Reports	22
Chapter Three. The Operational Research Section of the Eighth Bomber Command Continues to Organize, January–June 1943	27
A Crisis with Personnel	27
Harlan is Authorized to Recruit	29
The Bombing Accuracy Subsection Makes Fundamental Advances	30
“Permanent” quarters for ORS	34
Women helped from the beginning	34
Predictions of bombing accuracy	34

More from the bomb plots	35
Eighth Fighter Command Wants an ORS	35
Harlan's recruits	36
The Beginning of the Loss and Battle Damage Subsection	37
The Bombs and Fuzes Subsection Gets Underway	39
General Mission Analysis Subsection	41
Radar and Radio Countermeasures	42
Chapter Four. Operations Research in the Eighth Bomber Command, June–December 1943	49
Eighth Bomber Command Learns its Trade	49
Gunnery in the Eighth Bomber Command	51
Bombing Accuracy Subsection, June–December 1943	58
ORS becomes scorekeeper for the groups	58
The recruitment of G. Baley Price	59
Price begins his apprenticeship	61
Informal interaction with lead bombardiers	62
Bombing accuracy takes some flak	63
The work of the subsection as reflected in its reports	63
Preliminary action in the battle against the buzz bombs	63
The Bombs and Fuzes Selection Subsection	64
Incendiary bombs	65
Operational experimentation with bombs and fuzes	66
Attendance at the OPS conferences	67
Blind bombing	68
Radio Countermeasures—Carpet, Window, and Chaff	71
The Loss and Battle Damage Subsection through December 1943	73
Personnel	73
The significance of loss and damage to the offensive effort	73
Loss and battle damage suffered by aircraft of the Eighth Bomber Command	75
Analyzing the Causes of Loss and Battle Damage	76
Stragglers as a cause of loss	78
Vulnerability of the power plant	78
Fire as a cause of loss	79
Flak as a major cause of loss	79
Enemy fighters as <i>the</i> major cause of loss	80
When the losses took place	80
Fuel shortage as a cause of loss	81
Battle damage and its causes	83
Chapter Five. The Operational Research Section of the Eighth Fighter Command, March–December 1943	87
Background	87

Recruitment	88
Arrival and Orientation	91
The Work of the Section	93
Ammunition belting	93
Gunnery and battle damage	96
Radio and radar	97
Operations research by the assistant secretary of war	98
Operational efficiency	99
The Eighth Air Force Command Structure Reshuffles	100
The Section Helps Eighth Air Support Command	101
The Section Is Split	104
Chapter Six. The Operations Research Section of the Eighth Air Force, January 1944–6 June 1944	107
On Course for the Invasion of Northwest Europe	107
Bombing Accuracy—January, February, and March 1944	108
Radar bombing	108
Visual bombing accuracy in 1943 and early 1944	111
Bombing Accuracy Field Trips	115
The February trip—Youden preaches the doctrine of small patterns	115
The March field trip—Colonel Castle becomes an ORS supporter	116
The controversy over targets of opportunity and frags	117
Dr. Youden leaves the section	121
Gunnery Related Matters—January, February, and March 1944	122
The Eighth Air Force battles the GAF in the air	122
Hewitt spreads himself thin—January and February 1944	122
Hewitt is sent to the United States on temporary duty	123
U.S. mathematical work in gunnery	124
Two research groups on war problems	124
The training of gunnery analysts	124
Hewitt meets newsman Porter Henry, who becomes part of the section	126
Hewitt calls on the assistant secretary of war for air, R. A. Lovett	127
The General Mission Analysis Subsection	129
The Loss and Battle Damage Subsection, January through D Day	129
Flak becomes the major menace	130
The section works to reduce flak risk	131
Flak analysis in the Eighth Air Force—January to June 1944	132
Flak as a dominant cause of loss by June 1944	133
Gee-H Bombing and Radio Countermeasures	134
Gee-H bombing	134
Radio countermeasures	134

Buzz Bombs Such as the V-1—Phase One	135
Some ORS involvement with the V-weapons	136
Some evaluation	137
Fact and speculation on the V-weapon sites	138
Controversy over the best way to bomb the ski-sites	139
Mission Planning Work of the Bombs and Fuzes Section	141
Weapon and force requirement studies in general	141
Force estimates for the bomber offensive program	142
Zuckerman's transportation plan comes to the section	143
The section works out the force requirements for the marshalling yards	144
Preparation for the bridge bombings	149
Kring and Clarkson are BIGOTED	149
The Section's Work with H2X Gets Underway	150
Introduction	150
The air force bombs the wrong country	152
Colonel Castle pioneers a new bombing technique	152
Analysis of blind bombing accuracy requires new techniques	154
The Berlin mission of 29 April 1944	154
Blind bombing in May	155
The Heavies Prepare to Bomb the Beach Defenses on D Day	156
Price's connection with H2X preparation	156
Price gets an assistant by V-mail	157
The aerial bombardment of the defenses at Omaha beach on D Day	158
The Gunnery Subsection—April 1944 to D Day	160
The gunners of the Eighth Air Force get an official spokesman	160
Ayres' first major project	161
The section learns of nonpursuit curve attacks	161
Hewitt earns the Air Medal	162
Where was the Luftwaffe on D Day?	163
Chapter Seven. Operations Analysis in the Eighth Air Force, 6 June 1944–July 1944	167
The Military Background	167
The ORS Adds (and Loses) Personnel	168
The Gunnery Subsection, June–July 1944	169
Background	169
<i>Short Bursts</i>	169
Porter Henry is threatened with court-martial	170
Loss and Battle Damage, June–July 1944	171
The General Mission Analysis Subsection, June–July 1944	172
Gasoline consumption	172
The shuttle missions	173

Bombing Accuracy, June–July 1944	174
Visual bombing	174
Radar Bombing	174
Gee-H	174
Micro-H	175
H2X—The Oxford Experiment gets underway	176
Bombs and Fuzes	180
The transportation plan	180
V-weapons	182
The oil campaign officially begins	184
Ground survey work	184
Harlan and Alderman recommend against the bombing of French towns in road interdiction attacks	185
Major Troop Support Activities of the Eighth Air Force in June and July, The Breakout	186
Carpet bombing	186
Caen—Operation GOODWOOD	187
Purpose and size of force	187
Operation GOODWOOD as I experienced it	187
German assessment of the attack	189
The breakout at St-Lô	189
Bradley's plan—COBRA	189
The air force's role in COBRA	191
Bombing accuracy at St-Lô	192
The COBRA mission as I experienced it	192
The bombardment as experienced by newsman Ernie Pyle	193
The bombardment as seen by a German general	195
The assessment by General Omar N. Bradley	196
Chapter Eight. Operations Analysis in the Eighth Air Force, August–December 1944, Part I	201
Background	201
The war on the ground	201
The war from the air	202
Operation MARKET-GARDEN	202
The problem of the V-weapons	202
The oil offensive	202
The German oil industry as a strategic bombing target system	202
The attack on oil begins	203
The Battle of Merseburg-Leuna	204
Summary of oil offensive for 1944	205
Harlan Leaves the Section	205
Should operations research personnel be commissioned?	205
Harlan's leadership	206

Leslie Arps Takes Command of the Section and Meets Unacceptable Reorganization Proposals	207
Operational Research Sections at the Bombardment Divisions	210
Bombing Accuracy	213
Visual bombing—July–October 1944	213
The Oxford Experiment in H2X bombing	214
Gathering the data	214
A typical day and week during the experiment	215
Problems during the experiment	216
Conclusions and recommendations	218
Additional matters	219
In memoriam	221
Chapter Nine. Operations Analysis in the Eighth Air Force, August–December 1944, Part II	225
Four Ground Support Missions of the Eighth Air Force	225
The early stages of the Falaise Pocket: Operation TOTALIZE	225
Operation MARKET-GARDEN	226
Operation MADISON	229
Operation QUEEN	230
Micro-H Becomes Operational	231
Angus Taylor is assigned Micro-H bombing analysis	231
The November report on Micro-H	233
Tuttle Leaves the Section for the United States	234
Colonel Scott Devotes His Efforts to H2X Bombing	235
Synthetic Oil, Merseburg-Leuna	237
Merseburg, the number one target	237
Price makes a study of the Merseburg-Leuna target	237
The report of the Combined Strategic Targets Committee on oil tactics	238
The race between production and destruction at Merseburg-Leuna	238
The 2 November battle at Merseburg-Leuna	239
The strategic bombing survey view	239
The USAAF view of the operation	239
The Me-163, German rocket plane	240
My view of the 2 November Merseburg-Leuna mission	240
The problem of the best bombs and fuzes for synthetic oil plants	243
Chapter Ten. Operations Analysis in the Eighth Air Force, August–December 1944, Part III	251
Major Changes in Personnel	251
Seven analysts leave the section	251
Thirteen new analysts work for the section	252
Radio Countermeasures of the Eighth Air Force	253

Arps appeals for help from ABL-15	253
Carpet and Window (Chaff)	253
Carpet	253
Window	254
The RCM Squadron—its RAF origins and activities	254
Spoofs and screens for the Eighth Air Force	255
The ORS role in RCM work	256
Under Norton	256
Under Fubini	256
Gunnery, August–December 1944	257
Gunnery matters in August	258
Ayres’ memorandum on the Me-163 and Me-262	258
The view from <i>Short Bursts</i>	258
New waist gun sights	260
Acknowledgment	261
Gunnery matters in September and October	261
The company front attack	261
Specific GAF attacks in September	262
Major Stark’s grim memorandum	263
Odle reports for duty	265
Harmonization	266
Gunnery matters in November and December	268
The four air battles in November	268
The ORS gunnery posters	269
The two German plans for the use of the GAF in November and December	270
Galland’s plan for “The Great Blow”	270
Hitler’s plan for a Great Blow	271
December	272
Military action	272
The gunnery section carries on	273
The first real German jet plane becomes operational in September 1944	273
Chapter Eleven. Operations Analysis in the Eighth Air Force, August–December 1944, Part IV	277
Bombs and Fuzes	277
The V-weapons	277
The subsection’s recommendations	278
The success of the CROSSBOW operation	278
The heavy sites and the V-2	279
Bridge busting	280
More damage assessment by Alderman and Kring	281
The section’s work with bomb survey groups	281
Loss and Battle Damage	283
The Ninety-third Wing	283

The Ninety-sixth Wing of the Second Division	285
Cooperation with other air forces to reduce flak risk	286
Body armor	287
The Last Big Report on Bombing Accuracy	287
Bombing accuracy under conditions of good visibility	289
Visual bombing accuracy under conditions of poor visibility	290
H2X bombing	290
The problem of locating H2X bombfall	291
Cloud cover—the main factor in H2X bombing accuracy	292
Other reasons for inaccuracy	293
H2X bombing accuracy did not improve	293
Gee-H and Micro-H accuracy	294
Gee-H accuracy	295
Summary statement on Gee-H and Micro-H	296
A note on the American bombing of German cities	297
Why the section was unable to improve H2X bombing	298
Chapter Twelve. Operations Analysis in the Eighth Air Force, The Last Four Months of Combat Operations	301
January	301
The reassessment of bombing priorities	301
The GAF and the gunnery subsection	302
Bombing accuracy	304
Bombs and Fuzes	304
Ground surveys can be misleading	304
Flak and the Loss and Battle Damage Subsection	305
February	305
The Berlin and Dresden bombings give the bombing accuracy subsection a special assignment	305
Operation CLARION	308
Micro-H bombing in February	309
The Paris conference on bombing and gunnery effectiveness in February	310
March	312
The jets attack	312
The Berlin mission of 18 March	313
Ground support—crossing the Rhine	313
Gunnery activities	314
Loss and battle damage and radio countermeasures	314
Baley Price recalls two conferences	316
The End of the War in Europe	316
The last gasp of the GAF	317
Bombs and fuzes	319
The section closes	321

CONTENTS

xv

The air force expresses its appreciation	323
The value of operations analysts	325
Final comments	327
Appendix	333
Air Force Organization	333
Stateside Bombing Training	333
The Bomb Run (Visual Bombing)	334
The Bomb Run (Radar)	335
Bombing Terminology	336
Strike Photographs	336
The Bombing Payoff	337
Natural Hazards of High Altitude Flying, Anoxia and Frostbite	337
Glossary	339
Acronyms	343
Index of Names	345
