<b>Part 1. Introduction</b>	<b>1</b>
Chapter 1. Introduction: Four Strategies, the Prehistory of the Oslo Congress, and Sources	3
1.1. Four strategies for international mathematical communication	3
1.2. The prehistory of the Oslo congress	6
1.3. Sources	15
<b>Part 2. The Politics of the Congress</b>	<b>19</b>
Chapter 2. The Norwegian Hosts: The Newcomer with Historical Traditions	21
2.1. Prehistory of the ICM in Scandinavia	21
2.2. 1928: Norwegians enter the international stage in new numbers	26
2.3. The 1932 Zurich congress and the Norwegian bid for 1936	28
2.4. The 1929 Abel celebrations in Oslo	30
2.5. Setting up the organisation of the 1936 ICM	32
2.6. Efforts to secure funding and advertise the event	34
2.7. Promoting tourism in Norway	37
2.8. Setting up the programme of plenary speakers	39
2.9. The outlook and international ambitions of the organisers	47
2.10. How Oslo superseded Princeton for one week	59
Chapter 3. The German Delegation: Swaying between Expansionism and Isolationism	61
3.1. Preparation for the congress	61
3.2. German attendance and Lietzmann's reports	76
3.3. Further consequences of the congress for the German delegates	85

Chapter 4. The Russian Withdrawal: Isolationism out of Fear and Ideology	89
4.1. A conspicuous absence	89
4.2. Political obstacles	91
4.3. Russian and Soviet mathematics to 1936	93
4.4. Attempts to participate in Oslo	96
4.5. After Oslo	99
Chapter 5. The Italian Case: Mathematics as a Victim of World Politics	103
5.1. Introduction	103
5.2. Italian mathematicians and the early ICMs	105
5.3. Italian mathematics under Mussolini	109
Chapter 6. The Congress in the Norwegian Dailies	117
6.1. Mathematical refugees and other political and social issues	117
6.2. Commentary on Appendix A	120
Chapter 7. International Mathematics Shortly Before and After the Second World War: A Glimpse Ahead and Back Again	127
<b>Part 3. The Mathematics of the Congress</b>	<b>141</b>
Chapter 8. Assessing the Mathematics of the Congress	143
8.1. Developments in mathematical communication	144
8.2. Measuring mathematical impact	146
8.3. Languages and geographical distribution of speakers	149
8.4. Analysis of content: thematic restrictions	150
Chapter 9. The Plenary Lectures	159
9.1. Evaluating the plenary lectures	159
9.2. C. Størmer: “Programme for the quantitative discussion of electron orbits in the field of a magnetic dipole, with application to cosmic rays and kindred phenomena”	161
9.3. R. Fueter: “The theory of regular functions of a quaternion variable”	163
9.4. É. Cartan: “Some insights into the role of Sophus Lie’s theory of groups in the development of modern geometry”	165
9.5. C. L. Siegel: “Analytic theory of quadratic forms”	169
9.6. O. Veblen: “Spinors and projective geometry”	172
9.7. J. Nielsen: “Some methods and results from the topology of surface transformations”	176
9.8. E. Hecke: “Recent advances in the theory of elliptic modular functions”	178
9.9. O. Neugebauer: “On pre-Greek mathematics and its position relative to the Greek”	180
9.10. C. W. Oseen: “Problems of geometric optics”	183
9.11. V. Bjerknes: “New lines in hydrodynamics”	185
9.12. H. Hasse: “On the Riemann hypothesis in function fields”	188

9.13. G. D. Birkhoff: “On the foundations of quantum mechanics”	192
9.14. L. J. Mordell: “Minkowski’s theorems and hypotheses on linear forms”	194
9.15. L. V. Ahlfors: “Geometry of Riemann surfaces”	197
9.16. J. G. van der Corput: “Diophantine approximation”	202
9.17. S. Banach: “The theory of operations and their significance for analysis”	204
9.18. M. Fréchet: “Mathematical mélange”	208
9.19. N. Wiener: “Gap theorems”	210
9.20. Ø. Ore: “The decomposition theorems of algebra”	214
9.21. The plenary lectures that were planned but did not take place	218
9.22. The award of the first Fields Medals to Ahlfors and Douglas	225
Chapter 10. ICMI	231
Chapter 11. Conclusions Regarding the Mathematics of the Congress	235
