| Preface | xi |
| Part 1. Divisors | |
| Chapter 1. The dollar game | 3 |
| 1.1. An initial game | 3 |
| 1.2. Formal definitions | 5 |
| 1.3. The Picard and Jacobian groups | 10 |
| Notes | 12 |
| Problems for Chapter 1 | 13 |
| Chapter 2. The Laplacian | 15 |
| 2.1. The discrete Laplacian | 15 |
| 2.2. Configurations and the reduced Laplacian | 20 |
| 2.3. Complete linear systems and convex polytopes | 24 |
| 2.4. Structure of the Picard group | 27 |
| Notes | 35 |
| Problems for Chapter 2 | 36 |
| Chapter 3. Algorithms for winning | 39 |
| 3.1. Greed | 39 |
| 3.2. q -reduced divisors | 42 |
| 3.3. Superstable configurations | 45 |
| 3.4. Dhar's algorithm and efficient implementation | 46 |
| 3.5. The Abel-Jacobi map | 50 |
| Notes | 53 |
| Problems for Chapter 3 | 54 |

| | |
|---|-----|
| Chapter 4. Acyclic orientations | 57 |
| 4.1. Orientations and maximal unwinnables | 57 |
| 4.2. Dhar's algorithm revisited | 59 |
| Notes | 63 |
| Problems for Chapter 4 | 64 |
| Chapter 5. Riemann-Roch | 65 |
| 5.1. The rank function | 65 |
| 5.2. Riemann-Roch for graphs | 67 |
| 5.3. The analogy with Riemann surfaces | 70 |
| 5.4. Alive divisors and stability | 78 |
| Notes | 80 |
| Problems for Chapter 5 | 82 |
| Part 2. Sandpiles | |
| Chapter 6. The sandpile group | 87 |
| 6.1. A first example | 87 |
| 6.2. Directed graphs | 92 |
| 6.3. Sandpile graphs | 93 |
| 6.4. The reduced Laplacian | 97 |
| 6.5. Recurrent sandpiles | 100 |
| 6.6. Images of sandpiles on grid graphs | 105 |
| Notes | 110 |
| Problems for Chapter 6 | 111 |
| Chapter 7. Burning and duality | 115 |
| 7.1. Burning sandpiles | 116 |
| 7.2. Existence and uniqueness | 117 |
| 7.3. Superstables and recurrences | 119 |
| 7.4. Forbidden subconfigurations | 121 |
| 7.5. Dhar's burning algorithm for recurrences | 123 |
| Notes | 124 |
| Problems for Chapter 7 | 125 |
| Chapter 8. Threshold density | 127 |
| 8.1. Markov chains | 128 |
| 8.2. The fixed-energy sandpile | 137 |
| 8.3. The threshold density theorem | 147 |
| Notes | 155 |
| Problems for Chapter 8 | 156 |

Part 3. Topics

| | |
|---|-----|
| Chapter 9. Trees | 161 |
| 9.1. The matrix-tree theorem | 162 |
| 9.2. Consequences of the matrix-tree theorem | 168 |
| 9.3. Tree bijections | 171 |
| Notes | 186 |
| Problems for Chapter 9 | 187 |
| Chapter 10. Harmonic morphisms | 191 |
| 10.1. Morphisms between graphs | 191 |
| 10.2. Branched coverings of Riemann surfaces | 200 |
| 10.3. Household-solutions to the dollar game | 202 |
| Notes | 207 |
| Problems for Chapter 10 | 208 |
| Chapter 11. Divisors on complete graphs | 211 |
| 11.1. Parking functions | 211 |
| 11.2. Computing ranks on complete graphs | 214 |
| Problems for Chapter 11 | 222 |
| Chapter 12. More about sandpiles | 223 |
| 12.1. Changing the sink | 223 |
| 12.2. Minimal number of generators for $\mathcal{S}(G)$ | 226 |
| 12.3. M -matrices | 233 |
| 12.4. Self-organized criticality | 235 |
| Problems for Chapter 12 | 238 |
| Chapter 13. Cycles and cuts | 239 |
| 13.1. Cycles, cuts, and the sandpile group | 239 |
| 13.2. Planar duality | 244 |
| Problems for Chapter 13 | 249 |
| Chapter 14. Matroids and the Tutte polynomial | 251 |
| 14.1. Matroids | 251 |
| 14.2. The Tutte polynomial | 253 |
| 14.3. 2-isomorphisms | 256 |
| 14.4. Merino's theorem | 257 |
| 14.5. The Tutte polynomials of complete graphs | 260 |
| 14.6. The h -vector conjecture | 264 |
| Notes | 268 |
| Problems for Chapter 14 | 269 |

| | |
|--|-----|
| Chapter 15. Higher dimensions | 273 |
| 15.1. Simplicial homology | 273 |
| 15.2. Higher-dimensional critical groups | 280 |
| 15.3. Simplicial spanning trees | 283 |
| 15.4. Firing rules for faces | 287 |
| Notes | 290 |
| Problems for Chapter 15 | 291 |
| Appendices | |
| Appendix A | 297 |
| A.1. Undirected multigraphs | 297 |
| A.2. Directed multigraphs | 301 |
| Appendix B | 305 |
| B.1. Monoids, groups, rings, and fields | 305 |
| B.2. Modules | 306 |
| Glossary of symbols | 311 |
| Bibliography | 315 |
| Index | 319 |
