

Index

- 3/2-shuffle, 46
- 321 avoiding permutation, 303

- a*-shuffle, 52, 62, 81
- a*-shuffle (formula for), 29
- addition of a column of digits, 103
- adjacency, 255
- adjacent transpositions, 193
- Aguiar, M., 192, 266
- airline boarding, 69
- Aldous, D., 38, 43
- algebraic topology, 199
- apartments, 184
- Australian shuffle, 19

- background material, 8
- Baik-Deift-Johansson theorem, 70
- Baker's transformation, 26, 140, 205
- balanced carries, 112
- balanced carries (motivation for), 112
- balanced carries chain (left eigenvectors), 114
- balanced carries chain (right eigenvectors), 115
- balanced carries chain (stationary distribution), 113
- balanced carries chain (transition probabilities), 114
- Bayer, D., 31
- Bethe ansatz, 193
- biased riffle shuffle, 42, 70, 140, 238
- Bidigare, P., 172
- binary search tree, 160
- blackjack, 55, 57, 142, 255
- Boolean arrangement, 167, 172, 177
- Borel shuffle, 164
- braid arrangement, 169, 173, 177

- Brauer complex, 66, 212
- Brenti, F., 122
- bridge, 3, 55, 61, 255, 287
- Brown, K., 184, 188
- buildings, 184
- buildings (over a finite field), 188
- Butt shuffle, 12

- Cardano, G., 20
- carries, 6, 82, 99
- carries (connection with shuffling), 102, 124
- carries (large deviations), 118
- carries and additive combinatorics, 123
- carries and autoregressive processes, 123
- carries and cocycles, 123
- carries and fractals, 116
- carries and number theory, 116
- carries and Veronese subrings, 121
- carries chain (convergence rates), 105
- carries chain (eigenvalues), 101
- carries chain (eigenvectors), 101
- carries chain (left eigenvectors), 109
- carries chain (right eigenvectors), 109
- carries chain (stationary distribution), 101–103
- carries chain (transition matrix), 100, 111, 123
- carries process (covariance of), 110
- Carter, R., 66
- central limit theorem, 226
- chamber, 166
- character theory, 72
- Charlier shuffle, 261
- cheating, 22, 254, 259, 260, 289, 300
- Chen's integrals, 316, 318

- chi-squared distance, 34, 49
- cohomology, 92, 207
- Cola, G., 284
- combining shuffles, 284
- complex arrangements, 183
- Conger, M., 54
- convolution, 33
- coupling, 43, 44, 148, 163, 187, 277
- coupling (overhand shuffle), 261
- coupling (smoosh shuffle), 277
- cryptography, 289
- cutoff, 5
- cuts, 1, 19
- cycle structure, 62, 64, 140, 211, 212, 291
- cycle structure (top-to-random shuffles), 153
- cyclic descent, 32, 210
- cyclic homology, 229
- dealing methods, 59
- Delannoy path, 310
- descent, 29, 94, 126, 162, 210, 220, 225
- descent algebra, 222, 225, 226, 228, 229
- descent set, 221, 226, 241
- descent set (top-to-random shuffle), 154
- descents (top-to-random shuffle), 153
- determinantal point process, 104, 226
- Diaconis, McGrath, Pitman bijection, 64
- Diaconis, P., 31, 149, 184
- Dieker, A., 163
- diffusion limit, 278
- dihedral arrangement, 179
- dilution shuffling, 141
- directed acyclic graphs, 182
- Dobrow, R., 160
- down-and-under shuffle, 19
- Doyle, P., 39
- dynamical systems, 140, 222, 267
- effect of cuts, 31
- effect of dealing, 58
- Ehrenfest urn, 168, 182
- eigenvalues (of building walks), 189
- eigenvalues (of hyperplane walks), 172
- eigenvalues (of random-to-random shuffle), 163
- eigenvalues (of riffle shuffling), 82, 93
- eigenvalues (of tree walks), 185
- eigenvalues (top-to-random shuffle), 151
- eigenvectors, 81
- eigenvectors (for position of a card), 53
- eigenvectors (for riffle shuffling), 77, 82, 84, 86, 88, 93, 228
- eigenvectors (of carries chain), 107
- eigenvectors (of hyperplane walks), 179, 183
- eigenvectors (of restriction/induction chain), 90
- eigenvectors (of tree walks), 186
- eigenvectors (top-to-random shuffle), 151
- eigenvectors (uses of), 93
- Elmsley, A., 128
- enriched P -partition, 236
- entropy, 26, 27, 31, 34, 48, 168
- Erdnase, S. W., 259
- ergodic, 137
- ergodic Markov chain, 111
- Eulerian idempotents, 107, 110, 238
