Translator's Preface	ix
Author's Prefaces	xi
Preface to the Second Edition	xi
Preface to the Eighth Edition	xii
Preface to the Twelfth Edition	xii
Preface to the First Edition	xii
Introduction	1
<b>Book I</b>	
<b>On the Straight Line</b>	7
Chapter I. On Angles	9
Exercises	18
Chapter II. On Triangles	21
Exercises	29
Chapter III. Perpendiculars and Oblique Line Segments	31
Exercises	33
Chapter IV. Cases of Congruence for Right Triangles. A Property of the Bisector of an Angle	35
Exercises	37
Chapter V. Parallel Lines	39
Exercises	44
Chapter VI. On Parallelograms. — On Translations	45
Exercises	51
Chapter VII. Congruent Lines in a Triangle	53
Exercises	56
Problems for Book 1	57
<b>Book II</b>	
<b>On the Circle</b>	59
Chapter I. Intersection of a Line with a Circle	61
Exercises	64
Chapter II. Diameters and Chords	65

Exercises	69
Chapter III. The Intersection of Two Circles	71
Exercises	74
Chapter IV. Property of the Inscribed Angle	75
Exercises	81
Chapter V. Constructions	83
Exercises	95
Chapter VI. On the Motion of Figures	99
Exercises	107
Problems for Book II	108
<b>Book III</b>	
<b>On Similarity</b>	111
Chapter I. Proportional Lines	113
Exercises	121
Chapter II. Similarity of Triangles	123
Exercises	126
Chapter III. Metric Relations in a Triangle	129
Exercises	136
Chapter IV. Proportional Segments in a Circle. Radical Axis	139
Exercises	144
Chapter V. Homothecy and Similarity	145
Exercises	154
Chapter VI. Constructions	157
Exercises	167
Chapter VII. Regular Polygons	169
Exercises	188
Problems for Book III	188
<b>Complements to Book III</b>	193
Chapter I. Directed Segments	195
Exercises	198
Chapter II. Transversal	201
Exercises	206
Chapter III. Cross Ratio. Harmonic Concurrent Lines	209
Exercises	212
Chapter IV. Poles and Polars with respect to a Circle	213
Exercises	219

Chapter V. Inverse Figures	221
Exercises	227
Chapter VI. The Problem of Tangent Circles	231
Exercises	235
Chapter VII. Properties of Cyclic Quadilaterals. Peaucellier's Inverter	237
Exercises	244
Problems for the Complements to Book III	244
<b>Book IV</b>	
<b>On Areas</b>	247
Chapter I. The Measure of Areas	249
Exercises	255
Chapter II. Comparison of Areas	259
Exercises	260
Alternative Proofs of the Theorem on the Square of the Hypotenuse	262
Chapter III. Area of the Circle	263
Exercises	265
Chapter IV. Constructions	267
Exercises	268
Problems Proposed for Book IV	269
Note A:	
On the Methods of Geometry	271
(a) Theorems to Prove	271
(b) Geometric Loci – Construction Problems	278
(c) The Method of Transformations	281
Note B:	
On Euclid's Postulate	289
I	289
II	292
Note C:	
On the Problem of Tangent Circles	297
Note D:	
On the Notion of Area	303
Miscellaneous Problems .	309
Appendix:	
Malfatti's Problem	325
