Preface	xi
Chapter 1. Trisecting Angles	1
1.1. Some constructions	2
1.2. Two facts from geometry	6
1.3. Some possible constructions	8
1.4. The spiral of Archimedes	10
1.5. Constructible points and constructible numbers	12
1.6. Quadratic field extensions	18
1.7. An algebraic reformulation of the trisection problem	23
1.8. The $\frac{\pi}{3}$ angle cannot be trisected	26
1.9. Marks on the straightedge	28
1.10. Some historical notes	30
Chapter 2. Polyhedra	37
2.1. Definitions and examples	37
2.2. Euler's Formula	42
2.3. There are only five regular polyhedra	46
2.4. Some further applications of Euler's Theorem	47
2.5. Non-convex polyhedra	49
2.6. Tessellations of the plane	52
2.7. Map coloring	55
2.8. The Two Color Theorem	58
2.9. The Five Color Theorem	60
2.10. Some historical notes	64

---

Chapter 3. Hilbert Spaces	67
3.1. Inner products	67
3.2. Orthogonality	71
3.3. Adjoints	76
3.4. Some historical notes	85
Chapter 4. The Spectral Theorem	87
4.1. The Spectral Theorem	87
4.2. Quadratic forms and quadratic surfaces	94
4.3. Critical points	98
4.4. The Spectral Theorem for real linear spaces	103
4.5. The functional calculus	106
4.6. The commutant	111
4.7. Unitarily equivalent hermitian transformations	113
Chapter 5. Matrices and Topology	117
5.1. Euclidean topology	118
5.2. The topology on the space of matrices	120
5.3. The general linear group	126
5.4. A polynomial interlude	132
5.5. Sets defined by the adjoint operation	137
Chapter 6. Modules	143
6.1. Definitions and examples	143
6.2. Submodules	147
6.3. Simple rings	154
6.4. A ring theory interlude	162
6.5. Factorization in rings	167
6.6. Cyclic modules	172
6.7. Torsion modules over a principal ideal domain	179
6.8. Applications to linear algebra	188
6.9. Bases and free modules	197
6.10. Finitely generated modules over a principal ideal domain	201
6.11. Finitely generated abelian groups	204
Appendix	207
A.1. Groups	208
A.2. Rings	214
A.3. Vector spaces	218

---

A.4. Linear transformations	223
A.5. Lattices	229
A.6. Decomposition of matrices in the complex case	231
A.7. Decomposition of matrices in the real case	233
References	237
List of Symbols	239
Subject Index	241
