Preface	xi
Chapter 1. <b>Background</b>	1
Chapter 2. <b>Family and Basic Studies</b>	5
§2.1. The Lanczos Family	5
§2.2. From Löwy to Lánczos	6
§2.3. Basic Studies	7
Chapter 3. <b>A Change in Our World View:           The Theory of Relativity</b>	11
§3.1. Unsolved Problems	12
§3.2. New Problem—Again	13
§3.3. The Theory of Relativity	14
§3.4. A Fundamentally New Feature of the Theory	15
§3.5. The Need for a New Theory	16
Chapter 4. <b>Higher Studies</b>	17
§4.1. The First Position	18
§4.2. Contacting Einstein	19
§4.3. Getting His Ph.D.	20

---

Chapter 5. <b>Lanczos's Early Research in the Theory of Relativity</b>	23
§5.1. The Beautiful Years	23
§5.2. Probing the Theory of Relativity in Cosmology	25
§5.3. The Problem of Motion	26
§5.4. Einstein's Invitation	27
Chapter 6. <b>Contribution to Quantum Mechanics</b>	31
§6.1. The Frankfurt Mathematics Seminars	32
§6.2. The Quantum Mystery	33
§6.3. Matrix Mechanics—Quantum Mechanics	35
§6.4. Field-like Representation of Quantum Mechanics	36
§6.5. Wave Mechanics	38
§6.6. Farewell to Europe	41
Chapter 7. <b>Purdue Beginnings</b>	45
§7.1. Purdue	45
§7.2. "Workable Mathematics"	47
§7.3. "Telescoping" Power Series	48
§7.4. The Tau Method	49
§7.5. Trigonometric Truncations	50
§7.6. Having a Hard Time	52
Chapter 8. <b>The Educator</b>	55
§8.1. Experimental Curriculum for Women	55
§8.2. The Educational Value of Mathematics	57
§8.3. Some Improvement in Practical Fourier Analysis	59
§8.4. Fast Fourier Transform (FFT)	61
§8.5. Mathematical Tables Project	63
§8.6. Sad News	65
Chapter 9. <b>"Why Mathematics?"</b>	67
§9.1. Divine Occupation or Bread and Butter Question?	69

<b>Contents</b>	ix
§9.2. The Language of Nature	70
§9.3. Relation of Mathematics to Its History	71
<b>Chapter 10. Ripples on the Old Pond's Surface</b>	<b>73</b>
§10.1. Early Efforts	74
§10.2. Lanczos's Own Way	75
§10.3. Matter Waves and Electricity	76
<b>Chapter 11. The Lanczos Method</b>	<b>81</b>
§11.1. An Applied Mathematician in Industry	83
§11.2. Walker Aimes, Lecturer	84
§11.3. Learning How to Use Computers	85
§11.4. Exceptional History of an Exceptional Method	87
§11.5. Accused of Disloyalty	89
§11.6. Back to Europe	90
<b>Chapter 12. Full-Time Research</b>	<b>93</b>
§12.1. The Dublin Institute for Advanced Studies	93
§12.2. Electricity and General Relativity	95
§12.3. Doing Mathematics	98
§12.4. Well-Posed Problems	101
§12.5. Participating in Dublin's Social Life	102
<b>Chapter 13. Nature's Pythagorean Theorem</b>	<b>105</b>
§13.1. Synge the Pragmatic and Lanczos the Mystic	105
§13.2. What is Nature's Pythagorean Theorem?	106
§13.3. Lanczos's Philosophy of Science	107
§13.4. Continuing His Research	109
§13.5. Undulatory Riemannian Spaces	110
<b>Chapter 14. Probing Riemannian Space</b>	<b>113</b>
§14.1. The Lecturer	113
§14.2. Quadratic Action and Vector Potential	116
§14.3. Fourier Analysis of Random Sequences	118

---

§14.4. Gravitation and Riemannian Space	120
<b>Epilogue</b>	125
<b>A Brief Professional Chronology of Cornelius Lanczos</b>	129
<b>Published Papers and Books of Cornelius Lanczos</b>	133
Bibliography	149
Index	163
