# Index

- $L^2$ , 31, 45, 46, 60, 61, 145
- $\mathbb{L}^1(0, T)$ , 66
- $\mathbb{L}^2(0, T)$ , 66
- $\mathbb{M}^2(0, T)$ , 69
- $\sigma$ -algebra, 9–11, 18, 20, 29, 83, 103, 136, 139, 141
  - generated by random variable, 12
  - nonanticipating, 78
  
- almost surely (a.s.), 9
- arbitrage, 117
- autocorrelation function, 44
  
- Bachelier, L., 37
- Bayes's formula, 137
- Bernstein polynomial, 138
- Bertrand's paradox, 7–8, 10
- Bessel equation, stochastic, 143
- Borel sets  $\mathcal{B}$ , 11
- Borel–Cantelli Lemma, 21–22, 131, 132, 141
- Brown, R., 37
- Brownian bridge, 86, 142
- Brownian motion, 2, 3, 27, 35, 37–58, 61, 63–66, 78, 80, 81, 83, 86, 88, 90, 92, 106, 123, 124, 126, 130, 140–144
  - construction of, 45–51
  - continuity of sample paths, 54
  - definition, 41, 52
  - hitting time, 109
  - killed, 111
  - Markov property, 57
  - nondifferentiability of sample paths, 54
  - quadratic variation, 62
  - relation to Laplacian, 107–112
- Brownian scaling, 140
- Buffon's needle problem, 10
  
- Central Limit Theorem, 27–28, 41
- characteristic function, 22–23
- characteristics, 109
  - random, 109
- Chebyshev's inequality, 21, 25, 35, 132
- conditional expectation, 28–33, 141
- conditional probability, 18, 57
- continuity
  - Hölder, 53–55, 63, 97, 132, 141
  - Lipschitz, 93
- convergence in probability, 22
- conversion formula, 124
- convexity, 33, 35, 115, 139–141
  
- density, 10, 15, 16, 20, 38, 39, 137–139
- derivative, in finance, 117
- differential, stochastic, 3, 70, 74, 79, 80, 125
- Dirac point mass, 10, 37, 38, 44, 121
- discount factor, 117
- distribution function, 15
  - joint, 15
- drift, 4, 85, 117
- dynamic programming, 113
  
- Einstein, A., 37–39, 89
- elliptic operator, 106

- event, 9  
 expected cost, 113  
 expected value, 14  
 Feynman–Kac formula, 110–112  
 filtration, 65, 103, 141  
 Fourier transform, 22, 45  
 fundamental matrix, 99  
 future, 65  
 Gaussian  
   distribution, 16, 26, 41, 88  
   random variable, 22, 44, 45, 88, 89,  
   99, 121, 122, 140  
 generator, 106, 112  
 Haar functions, 46  
 harmonic function, 109  
 harmonic oscillator, random, 89  
 hedging, 118  
 Hermite polynomial, 73–74  
 history  
   of a process, 34, 57, 66, 83, 105, 141  
   of Brownian motion, 65  
 Hölder’s inequality, 130  
 identically distributed, 24  
 independent  
    $\sigma$ -algebras, 18  
   events, 18  
   random variables, 18  
 independent increments, 41, 62, 64, 80,  
   140  
 indicator function, 12  
 infinitely often (i.o.), 21  
 inner product, 31  
 Itô  
   chain rule, 3, 4, 70, 71, 76–78, 80–82,  
   85, 99, 100, 106, 111, 114, 116, 118,  
   125, 135, 142  
   integration-by-parts formula, 75  
   product rule, 74–76, 81, 82, 111, 120  
   stochastic integral, 3, 59–82  
 Jensen’s inequality, 140  
   conditional, 140  
 Kolmogorov, A. N., 53, 54, 97  
 Langevin equation, 86, 89, 142  
 Laplace–De Moivre Theorem, 25–27,  
   40, 127–129  
 Laplacian, 107, 108  
 Law of Large Numbers, 24–25, 27  
 least squares, 30  
 Markov process, 57, 58  
 martingale, 34–36, 70, 92, 126, 130, 141,  
   142  
   inequalities, 35, 36, 95, 129, 131  
 mean-value formula, 110  
 mesh size, 61  
 nonanticipating, 78  
 norm, 31  
 option, 117  
 ordinary differential equation (ODE), 1,  
   91, 97, 99, 122  
   blow up, 142  
   nonuniqueness, 143  
 Ornstein–Uhlenbeck equation, 88  
 Paley–Wiener–Zygmund stochastic  
   integral, 59–61, 75  
 partial derivatives, notation for, 38, 78  
 partial differential equation (PDE),  
   108–112  
   backwards diffusion equation, 142  
   Black–Scholes–Merton, 120  
   diffusion equation, 38, 39  
   Laplace’s equation, 109  
   obstacle problem, 115  
   penalized problem, 115  
 partition, 36, 61–63, 66, 69, 74, 123, 124  
 Perrin, J., 38  
 price function, 118  
 probability space, 8–11, 16, 17  
 progressively measurable, 65  
 projection, 30, 31  
 Rademacher functions, 19  
 random variable, 11–13  
 random walk, 39  
 Riemann sum, 61–64, 69, 74, 123, 129  
 sample path, 13  
 sample point, 9  
 Schauder functions, 47  
 self-financing, 119, 120  
 simple function, 12  
 spectral density, 45  
 stationary process, 44  
 step process, 66–68  
 Stirling’s formula, 127  
 stochastic differential equation (SDE),  
   3, 83–102

- homogeneous, 98
- examples, 4, 84–90, 98–102
- existence, uniqueness of solutions,
  - 92–96
- linear, 98–102
- linear in narrow sense, 98
- properties of solutions, 96–98
- stochastic process, 13
- stock price, 4, 37, 85
- stopping set, 115, 146
- stopping time, 103–107, 113–116, 144
- Stratonovich
  - chain rule, 125
  - integral, 64, 121–126
  - stochastic differential, 125
- submartingale, 34, 35, 129–131, 141
- successive approximation, 90, 94
  
- value function, 113
- variance, 14, 16, 38, 87, 88
- version of a process, 54, 70, 131
- volatility, 4, 85, 117
  
- white noise, 2, 3, 43–45, 84, 86, 88, 99,
  - 121, 122, 125
- Wiener, N., 2, 39
