

## Contents

Chapters in the Companion Volume	ix
Preface	xi
Suggestions on How to Read This Volume	xxi
Chapter 1. Fractions	1
1.1. Definition of a fraction	3
1.2. Fractions as division	21
1.3. Equivalent fractions	27
1.4. Adding and subtracting fractions	43
1.5. Multiplying fractions	56
1.6. Dividing fractions	70
1.7. Complex fractions	88
1.8. FASM	95
1.9. Percent, ratio, and rate problems	99
1.10. Finite probability	121
1.11. Appendix	143
Chapter 2. Rational Numbers	145
2.1. The two-sided number line	145
2.2. Adding rational numbers	147
2.3. Subtracting rational numbers	160
2.4. Multiplying rational numbers	164
2.5. Dividing rational numbers	174
2.6. Comparing rational numbers	183
2.7. FASM, revisited	197
Chapter 3. The Euclidean Algorithm	203
3.1. The reduced form of a fraction	203
3.2. The Fundamental Theorem of Arithmetic	219
Chapter 4. Experimental Geometry	229
4.1. Overview	229
4.2. Freehand drawing	236
4.3. Constructions using tools	239
4.4. The basic isometries	252
4.5. Congruence	287

4.6. Dilation	301
4.7. Similarity	320
Chapter 5. Length, Area, and Volume	339
5.1. The concept of geometric measurement	340
5.2. Length	348
5.3. Area	356
5.4. Volumes of cylinders and cones	376
Bibliography	381
