

Index

- \mathbb{Z}_m , 101–103
 - addition in, 104
 - consistency of, 106
 - multiplication in, 104
 - consistency of, 106
 - multiplicative inverse of element in, 113
- addition of fractions, 145
- addition of fractions
 - least common denominator method, 149
 - sure fire method, 147
- addition of integers, 2
 - additive identity, 4
 - additive inverse, 4
 - associativity, 3
 - closure, 2
 - commutativity, 3
- alternating sum, 97
- base10 expansion, 93
- codivisor, 17, 61, 63, 65
- coefficient algorithm, 43, 112
- cofactor, 17
- common denominator, 119, 147
 - least (lcd), 72, 75, 120, 121
- common divisor
 - greatest (gcd), 31, 39, 43, 59, 71, 121
- common multiple
 - least [lcm], 71, 120
- congruence, 85
 - additive property, 88
 - class mod m , 100
 - mod 12, 83
 - mod 2, 81
 - mod m , 85
 - mod p , 176
 - multiplicative property, 88
 - powers property, 88
 - reflexive property, 88
 - symmetric property, 88
 - transitive property, 88
- cross product, 125
- decimal, 162
 - expansion, 161
 - nonterminating, 163
 - terminating, 163, 170
 - fraction, 161, 170
 - nonterminating, 163
 - place value of, 162
 - point, 162
 - repeating, 168, 174
 - terminating, 163
- decimals
 - comparison, 188
 - placing on number line, 196
- distributivity
 - in \mathbb{Z} , 6
 - for fractions, 156
 - in \mathbb{Z} , 156
- divisibility, 15
 - reflexivity, 16
 - transitivity, 16
- division algorithm, 35, 57, 84, 100, 164
- division of fractions, 139
 - quotient, 139
- divisor, 16, 32, 65, 68
 - prime, 53
- equivalence
 - class, 129
 - representative of, 129
 - cross product criterion for, 125, 135
 - properties of, 127
- equivalence of fractions
 - and order, 181
- Euclid's Game, 48
- Euclidean Algorithm, 40, 46, 72, 75, 121, 150
- factor, 32

- tree, 19
- fraction, 116
 - denominator of, 116
 - in lowest terms, 129, 131, 191, 192
 - negative, 180
 - numerator of, 116
 - reciprocal of, 137
 - zero, 127, 180
- fractions
 - addition of
 - properties of, 153
 - comparison of, 182
 - distance between, 192
 - division of, 140
 - equal, 116, 123
 - equivalent, 124
 - subtraction of, 155
- Fundamental Theorem of Arithmetic, 58, 60
- integer, 2
 - comparison of, 23
 - composite, 51
 - even, 81
 - odd, 81
 - point, 26, 190
 - positive, 23
- least residue (mod m), 100, 107
- linear combination, 21, 32, 39, 43
- linear congruence, 109
 - solution of, 109
- midpoint of line segment, 195
- minmax rule, 74
- minus a , 5, 11
- mixed number, 161
- mixed number, 138
- modulus, 85
- multiple, 16
- multiplication in \mathbb{Z} , 5
 - associativity, 5
 - closure, 5
 - commutativity, 6
- multiplication of fractions, 117
 - and equivalence, 134
 - properties of, 136
- natural numbers, 8
- number line, 25, 190
- operation on S , 9
- order in \mathbb{Z} , 23, 179
 - properties of, 23
- negativity, 24
- positivity, 23
- totally ordered, 25, 26, 28
- trichotomy, 25, 27
- order on fractions, 179
 - properties of, 184
- part of a part, 117
- perfect square, 17, 65, 68, 69
- pigeonhole principle, 168, 205
- prime number, 19, 51, 59
- prime power factorization, 62, 65
- rate of change, 142
 - speed, 142
- rational point, 192
 - distance between, 192
- relatively prime, 31, 39, 59, 91, 110
- repetend, 168, 174
 - length of, 168
- Reverse Euclid's Game, 48
- Reverse Euclidean Algorithm, 46
- Sieve of Eratosthenes, 55
- subtraction in \mathbb{Z} , 5
- Well Ordering Property, 26, 35, 41, 53, 61, 129
- whole numbers, 8
