

Index

- Canonical decomposition, 12
- Complex number, **43**
- Composition
 - of permutations, **60**
- Congruence
 - of numbers, **9**
 - of polynomials, **141**
- Conjugate permutations, **61**
- Cycle, **60**

- Derivative
 - of polynomial, **113**
- Diameter of a subset of Euclidean space, 53

- Euclidean algorithm
 - for Gaussian numbers, 48
 - for integers, 15
 - for polynomials, 42
 - for real numbers, 42
- Euclidian algorithm
 - for integers, 11

- Formula
 - De Moivre, 43
 - Leibniz, 86
 - Taylor, 114
- Function
 - convex, **69**
- Fundamental Theorem of Arithmetic, 5

- Greatest common divisor, GCD, **6**

- Inequality
 - Bernoulli, 91
 - Cauchy, 70
 - weighted, 76
 - Cauchy–Bunyakovsky–Schwarz, 74
 - Chebyshev, 73
 - Jensen, 70
 - Muirhead, 75
 - rearrangement, 73
 - Young, 74

- Lagrange resolvent method, 135
- Least common multiple, LCM, **7**
- Lemma
 - Burnside, 67
 - on conjugation, 151, 155, 159, 162, 181, 183
 - Lemma about increasing the exponent, 28

- Method
 - del Ferro, 34
 - Ferrari, 35
 - of variation of constants, 89
 - Vieta, 35

- Number
 - composite, **4**
 - prime, **4**
 - real constructible, **125, 139**
 - transcendental, **99**

- Order
 - of residue modulo prime, **18**
 - of permutation, **60**

- Parity
 - of permutation, **63**
- Permutation, **59**
 - inverse, **60**
 - type of, **61**
- Polynomial, **39**
 - elementary symmetric, 46
- Primitive root by modulo, **26**

- Quadratic
 - nonresidue, **22**
 - residue, **22**
- Quadratic reciprocity law, 24

- Resolvent cubic, **35**
- Rule
 - Descartes' rule of signs, 113
 - Leibniz, 113
 - Sturm, 115

- Sturm's, 118
- Sequence
 - of differences, **85**
 - of sums, **85**
- Sum of series, **95**
- Theorem
 - on division with remainder
 - of integers, 8
 - on division with remainder
 - of Gaussian numbers, 48
 - of polynomials, 41
 - on insolvability in real radicals, 181
 - on integer roots, 32
 - on intermediate value, 112
 - on rational roots, 32
 - Bezout, 39
 - Chinese Remainder Theorem, 11
 - Euler, 18
 - Fermat, 113
 - Fermat's Little Theorem, 17
 - Fundamental Theorem
 - of Algebra, 44
 - on Symmetric Polynomials, 46
 - Galois, about insolvability in radicals, 129
 - Gauss on constructibility of regular polygons, 126, 179
 - Gauss, on constructibility of regular polygons, 143
 - Kronecker on insolvability, 184
 - Kronecker, on insolvability, 129
 - Lagrange's, on mean value, 114
 - Liouville, 100
 - Mahler, 101
 - Primitive Root Theorem, 27
 - Rolle, 114
- Transformation
 - Abel, 86, 97
- Transpositions, **61**
