Contents

Preface vii

Chapter 1. Seminar 1: Polygons in the Plane 1
Preface. To the Seminar Leaders 1
1. The Definition of a Polygon 2
2. Classification of Triangles 6
3. Classification of Quadrilaterals 7
4. Congruence 9
5. Angles: A Review and Some Remarks 10
6. Angles and Parallel Lines 12
7. Homework 13

Chapter 2. Seminar 2: More Fundamentals of Plane Geometry 15
1. Interior Angles of Polygons 15
2. The Pythagorean Theorem 22
3. The Distance Between Points in the Plane 25
4. Definition of a Circle 27
5. An Interesting Classroom Activity on Circles 28
6. Homework 31

Chapter 3. Seminar 3: Tessellation 35
1. Introduction 35
2. Tessellating with Triangles 38
3. Why Discuss Tessellation in the Classroom? 42
4. Tessellation with Quadrilaterals 43
5. Tessellation with Pentagons 50
6. Pentagons, Hexagons and n-gons with $n > 6$. 52
7. Homework 54
8. References 55

Chapter 4. Seminar 4: Regular Polygons and Regular Polyhedra 57
1. Construction of a regular 3-gon, 4-gon, 5-gon and 6-gon 57
2. The Five Regular Polyhedra 65
3. Homework 70
4. Pentagon Construction Proof (Optional) 72

Chapter 5. Seminar 5: Symmetry 77
1. The Symmetries of an Equilateral Triangle 77
2. The Arithmetic of the Symmetries of the Equilateral Triangle 83
3. Representing Symmetries by Permutations 87
4. The Symmetries of a Square 90
5. Representing Symmetries by Permutations 92
6. Homework 94

Chapter 6. Seminar 6: Lattice Polygons 97
1. Introduction to Lattice Polygons 97
2. Lattice Squares 101
3. Which Positive Integers Are Sums of Two Squares? 110
4. Homework 111

Chapter 7. Seminar 7: The Area of Polygonal Regions 113
1. The Properties of the Area of a Polygonal Region 113
2. The Area of Rectangular and Triangular Regions 114
3. The Area of Other 4-sided Regions 118
4. The Area of Other Polygonal Regions 122
5. The Area of the Region in a Lattice Polygon 125
6. Homework 130

Chapter 8. Seminar 8: The Area of a Disk and Disk Packing 133
1. Introduction 133
2. Disk Packing Activity I 133
3. The Area of a Disk 137
4. Disk Packing Activity II 143
5. The Density of Packings on the Entire Plane 145
6. Homework 150

Chapter 9. Seminar 9: Dissection 153
1. Introduction to Dissection 154
2. Dissection of any Parallelogram into a Rectangle of the Same Base Length and Height 159
3. Dissection of any Rectangle into any other Rectangle of the Same Area, an Example 166
4. (Optional) Dissection of an Arbitrary Rectangle into any other Rectangle of the Same Area 169
5. Dissection of Polygons of the Same Area 172
6. Homework 175

Chapter 10. Seminar 10: Geometry in Three Dimensions 177
1. Points, Lines and Planes in $\mathbb{R}^3$ 177
2. Coordinates in 3-space 183
3. Prisms and Pyramids 187
4. Volume of Prisms and Pyramids 195
5. Homework 199

Index 201
