Foreword to the American Edition	vii
Introduction	1
A Parent's Journal	1
Why a circle? Why a journal?	2
Should journals be edited?	4
A novice's reflections on pre-school math	5
Opinions	8
A Short History of Our Circle	9
Acknowledgments	12
Two Disclaimers	13
Chapter 1. The First Session: Narrative and Reflections	15
A session in action	15
Piaget's phenomena: reality or illusion?	24
Why read psychology books?	28
Why do we need theories?	32
Chapter 2. The Boys' Math Circle, Year One	35
Session 21. The Möbius band	35
Session 22. What is bigger, the whole or its part?	37
Session 23. The Tower of Hanoi	41
Session 24. A bit of topology	45
Session 25. The boy in the elevator	47
Session 26. Intersecting classes	48
Session 27. Pegboard quadrilaterals	50
Session 28. We start probability theory	52
Session 29. Total failure	54
Session 30. Pouring water	56
Session 31. Probability theory, again	60
Session 32. Diplomas	62
A few more problems	63
How to draw a cube?	67

Chapter 3. Children and $\binom{5}{2}$: The Story of One Problem	69
A combinatorial puzzle	70
Equivalent problems	71
Denoting...	74
Proof	76
Physics and logic	79
Chapter 4. The Boys' Math Circle, Year Two	83
Session 33. Geometric similarity	83
Session 34. An uneventful session	86
Session 34. Almost calculating probabilities	87
Session 36. A game of three dice	90
Session 37. How many rectangles?	92
Session 38. Losing my grip	94
Session 39. Back on track	96
A short excursion into the past.	97
The programming language <i>Kid</i>	100
Session 40. First encounter with Dienes blocks	105
Session 41. More of the same (robots and Dienes blocks)	107
Session 42. Snowflakes	109
Session 43. On certain properties of addition	111
Session 44. Magic squares	115
Session 45. Generalized chains	117
Session 46. Isomorphic problems	119
Session 47. The end of the story about $\binom{5}{2}$.	120
Session 48. True and false statements.	122
A bit of programming, just with Dima	123
Session 49. Thinking about symbols	125
Session 50. A double anniversary	128
Session 51. Which path is longer?	129
Session 52. Breaking a code	131
Session 53. A genealogical tree	132
Session 54. The end of the school year	134
Chapter 5. Notation, abstraction, mathematics, and language	137
Symbols for words	137
"Simplified" notation?	139
Each person has more than one type of intelligence	141
Teaching mathematics as a native tongue	144
Chapter 6. The Boys' Math Circle, Year Three	149
Session 55. Logical problems	149
Session 56. Construction foreman	152
Session 57. Who is booter, Gobr or Stoon?	154
Session 58. Floor plans	158
A long hiatus	160

Session 59. What does the other person see?	164
Session 60. Reflection	167
Session 61. How do you add invisible numbers?	169
Session 62. Which room is larger?	172
Session 63. Reason versus chance	173
Session 64. We battle against the odds, again	176
Session 65. Homeomorphism	180
Session 66. Topology	183
Session 67. Four colors	184
Miscellaneous jokes, conversations, and puzzles	185
Chapter 7. The Boys' Math Circle, Final Six Months	195
Session 68. Calendar conundrum	195
Session 69. Oral puzzles	197
Session 70. More programming	200
Session 71. Classroom puzzles . . . almost	203
Session 72. Subprograms	205
Session 73. Odd numbers and squares	208
Session 74. The geometry of numbers	210
Session 75. The Mayans	212
Session 76. All things must end, sometime	214
Chapter 8. At Home and in School	217
Mathematical discussions, with sad digressions about school	217
First graders	234
Chapter 9. The Girls' Math Circle, Year One	239
Introduction	239
Session 1. Piaget's phenomena, again	246
Session 2. Princes and princesses	251
Session 3. How many differences?	253
Session 4. Building from diagrams	256
Session 5. Permutations	259
Session 6. The boy's morning	261
Session 7. Play trumps science	262
Session 8. Between two mirrors	264
Session 9. In the courtyard	266
Session 10. Bi-colored cubes	270
Session 11. Fives	271
Chapter 10. The Girls' Math Circle, Year Two	273
Session 12. Something's amiss with probability theory	273
Session 13. Intersecting classes again	275
Session 14. The Tower of Hanoi	277
Session 15. Towers of equal height	278
Session 16. Turning 90°	280

Session 17. Snowflakes	281
Session 18. Faces, vertices, and edges of a cube	282
Session 19. The wolf, the goat, and the cabbage	286
Session 20. A chain with one difference	290
Epilogue	295
Index of Math, Pedagogy, and Psychology	299
