

Table of Contents for MEMO/254/1213

From Vertex Operator Algebras to Conformal Nets and Back

- Introduction
- Preliminaries on von Neumann algebras
- Preliminaries on conformal nets
- Preliminaries on vertex algebras
- Unitary vertex operator algebras
- Energy bounds and strongly local vertex operator algebras
- Covariant subnets and unitary subalgebras
- Criteria for strong locality and examples
- Back to vertex operators
- Appendix A. Vertex algebra locality and Wightman locality
- Appendix B. On the Bisognano-Wichmann property for representations of the Möbius group
- Bibliography
