## Geometric Pressure for Multimodal Maps of the Interval

- Introduction: The main results
- Preliminaries
- Non-uniformly hyperbolic interval maps
- Equivalence of the definitions of geometric pressure
- Pressure on periodic orbits
- Nice inducing schemes
- Analytic dependence of geometric pressure on temperature equilibria
- Proof of key lemma: Induced pressure
- Appendix A. More on generalized multimodal maps
- Appendix B. Uniqueness of equilibrium via inducing
- Appendix C. Conformal pressures
- Bibliography
