

# Contents

Chapter 1. Introduction	1
1.1. Overview of our approach	2
1.2. Organization and Main Results	2
1.3. Conventions and Notations	8
Acknowledgments	8
Chapter 2. Preliminaries on higher topos theory	11
2.1. The epi-mono factorization system	13
2.2. Grothendieck topologies	14
2.3. Sheaves on $\infty$ -categories of $\infty$ -topoi.	17
2.4. The $(\infty, 2)$ -category of $\infty$ -topoi.	18
Chapter 3. Local Homeomorphisms and Étale Maps of $\infty$ -Topoi	19
3.1. Topoi as Generalized Spaces	19
3.2. Local homeomorphisms, sheaves, and étale maps	21
3.3. The étale topology on $\infty$ -topoi.	26
Chapter 4. Structured $\infty$ -Topoi	31
4.1. Structure Sheaves and Classifying Topoi	31
4.2. Geometries and Geometric Structures	34
4.3. Étale Morphisms of Structured $\infty$ -Topoi	38
Chapter 5. Étendues: Gluing Local Models	41
5.1. Étendues	41
5.2. The functor of points approach	55
5.3. A classification of the functor of points.	75
Chapter 6. Examples	95
6.1. Higher Differentiable Orbifolds and Étale Stacks	95
6.2. Deligne-Mumford Stacks for a Geometry	106
Bibliography	119
