Introduction	vii
Chapter 1. Carnot groups	1
1.1. Carnot groups	1
1.2. Contact mappings	4
1.3. Dimension comparison in Carnot groups	5
Chapter 2. Carnot groups of Iwasawa type and conformal mappings	7
2.1. Iwasawa groups of complex, quaternionic or octonionic type	7
2.2. Conformal mappings on Carnot groups	14
Chapter 3. Metric and geometric properties of conformal maps	19
3.1. Norm of the horizontal differential and local Lipschitz constant	19
3.2. Koebe distortion theorems for Carnot conformal mappings	22
Chapter 4. Conformal graph directed Markov systems	27
4.1. Graph Directed Markov Systems	27
4.2. Carnot conformal graph directed Markov systems	31
Chapter 5. Examples of GDMS in Carnot groups	37
5.1. Infinite self-similar iterated function systems	37
5.2. Iwasawa conformal Cantor sets	37
5.3. Continued fractions in Iwasawa groups	38
5.4. Complex hyperbolic Kleinian groups of Schottky type	41
Chapter 6. Countable alphabet symbolic dynamics: foundations of the thermodynamic formalism	43
6.1. Subshifts of finite type and topological pressure	43
6.2. Gibbs states, equilibrium states and potentials	54
6.3. Perron-Frobenius Operator	64
Chapter 7. Hausdorff dimension of limit sets	73
7.1. Topological pressure, θ -number, and Bowen's parameter	73
7.2. Hausdorff dimension and Bowen's formula	77
7.3. Characterizations of co-finitely regular and strongly regular Carnot conformal IFS	82
7.4. Dimension spectrum for subsystems of Carnot conformal IFS	85
Chapter 8. Conformal measures and regularity of domains	89
8.1. Bounding coding type and null boundary	89
8.2. Regularity properties of domains in Carnot groups	91
8.3. Conformal measure estimates	93

Chapter 9. Examples revisited	101
9.1. Infinite self-similar iterated function systems	101
9.2. Continued fractions in groups of Iwasawa type	102
9.3. Iwasawa conformal Cantor sets	105
Chapter 10. Finer properties of limit sets: Hausdorff, packing and invariant measures	109
10.1. Finiteness of Hausdorff measure and positivity of packing measure	109
10.2. Positivity of Hausdorff measure and finiteness of packing measure	111
10.3. Hausdorff and packing measures for continued fraction systems in groups of Iwasawa type	119
10.4. Hausdorff dimensions of invariant measures	121
Chapter 11. Equivalent separation conditions for finite GDMS	129
