Chapter 1. Introduction	1
1.1. A brief history of Lojasiewicz–Simon gradient inequalities and their applications to gradient flows and energy gaps in geometric analysis	1
1.2. Lojasiewicz–Simon gradient inequalities for analytic functions on Banach spaces	2
1.3. Lojasiewicz–Simon gradient inequalities for coupled Yang–Mills energy functions	6
1.3.1. Lojasiewicz–Simon gradient inequalities for boson and fermion coupled Yang–Mills energy functions	6
1.3.2. Lojasiewicz–Simon $W^{-1,2}$ gradient inequalities for boson and fermion coupled Yang–Mills energy functions	10
1.3.3. Lojasiewicz–Simon gradient inequality for Yang–Mills–Higgs energy functions	11
1.3.4. Lojasiewicz–Simon gradient inequality for the Seiberg–Witten energy function	12
1.3.5. Lojasiewicz–Simon gradient inequality for non-Abelian monopole energy functions	13
1.3.6. Lojasiewicz–Simon gradient inequality for the multiple spinor Seiberg–Witten energy function	14
1.3.7. Lojasiewicz–Simon gradient inequality for the pure Yang–Mills energy function near $G_2$ -instantons	15
1.4. Applications of the Lojasiewicz–Simon gradient inequality for coupled Yang–Mills energy functions	16
1.5. Automorphisms and transformation to Coulomb gauge	16
1.5.1. Transformation to Coulomb gauge	17
1.5.2. Real analytic Banach manifold structures on quotient spaces	19
1.6. Outline of the monograph	20
1.7. Notation and conventions	20
Chapter 2. Existence of Coulomb gauge transformations for connections and pairs	21
2.1. Action of Sobolev gauge transformations on Sobolev connections	21
2.2. A priori estimates for Laplace operators with Sobolev coefficients and existence and uniqueness of strong solutions	22
2.3. Regularity for distributional solutions to an elliptic equation with Sobolev coefficients	29
2.4. Surjectivity of a perturbed Laplace operator	30

2.5.	A priori estimates for Coulomb gauge transformations	34
2.6.	Existence of Coulomb gauge transformations for connections that are $W^{1,d/2}$ -close to a reference connection	41
2.7.	Existence of Coulomb gauge transformations for connections that are $L^r$ -close to a reference connection	47
2.8.	Real analytic Banach manifold structure on the quotient space of connections	50
2.9.	Existence of Coulomb gauge transformations for pairs	53
2.10.	Existence of Coulomb gauge transformations for pairs that are $L^r$ -close to a reference pair	56
2.11.	Regularity for solutions to the pure and coupled Yang–Mills equations	58
Chapter 3. Lojasiewicz–Simon gradient inequalities for coupled Yang–Mills energy functions		
		63
3.1.	Lojasiewicz–Simon gradient inequality for the boson coupled Yang–Mills energy function	63
3.1.1.	Analyticity of the boson coupled Yang–Mills energy function and its gradient map on the Sobolev space of pairs	63
3.1.2.	Fredholm and index properties of the Hessian operator for the boson coupled Yang–Mills energy function on the Sobolev space of pairs	72
3.1.3.	Gradient map and Hessian operator for the boson coupled Yang–Mills energy on a Coulomb-gauge slice	75
3.1.4.	Analyticity of the gradient map for the boson coupled Yang–Mills energy function on a Coulomb-gauge slice	80
3.1.5.	Estimates for gauge transformations intertwining two pairs	81
3.1.6.	Completion of the proof of Theorem 4	83
3.2.	Lojasiewicz–Simon gradient inequality for the fermion coupled Yang–Mills energy function	87
Chapter 4. Lojasiewicz–Simon $W^{-1,2}$ gradient inequalities for coupled Yang–Mills energy functions		
		91
4.1.	Technical preparation for the proof of the $W^{-1,2}$ gradient inequalities for coupled Yang–Mills energy functions	91
4.2.	Completion of the proofs of the the $W^{-1,2}$ gradient inequalities	99
Appendix A. Fredholm and index properties of elliptic operators on Sobolev spaces		
		103
Appendix B. Equivalence of Sobolev norms defined by Sobolev and smooth connections		
		109
Appendix C. Fredholm and index properties of a Hodge Laplacian with Sobolev coefficients		
		115
Appendix D. Convergence of gradient flows under the validity of the Lojasiewicz–Simon gradient inequality		
		121
Appendix E. Huang’s Lojasiewicz–Simon gradient inequality for analytic functions on Banach spaces		
		125

Appendix F. Quantitative implicit and inverse function theorems	127
Bibliography	133
