Introduction	1
Notation	11
Chapter 1. Hankel Transforms and Bessel Kernels	13
1. Preliminaries	13
2. The Function Spaces $\mathcal{S}_{\text{sis}}(\mathbb{R}_+)$ , $\mathcal{S}_{\text{sis}}(\mathbb{R}^\times)$ and $\mathcal{S}_{\text{sis}}(\mathbb{C}^\times)$	21
3. Hankel Transforms and Bessel Kernels	30
4. Bessel Functions and Bessel Kernels in Classical Cases	41
5. Fourier Type Integral Transforms	44
6. Integral Representations of Bessel Kernels	50
A. A Prototypical Example of Bessel Functions	59
Chapter 2. Analytic Theory of Bessel Functions	61
7. The Rigorous Interpretation of the Formal Integral $J_\nu(x; \varsigma)$	61
8. Equality between $J_\nu(x; \varsigma)$ and $J(x; \varsigma, \lambda)$	65
9. $H$ -Bessel Functions and $K$ -Bessel Functions	67
10. Recurrence Formulae and the Differential Equations for Bessel Functions	74
11. Bessel Equations	79
12. Connections between Various Types of Bessel Functions	95
13. $H$ -Bessel Functions and $K$ -Bessel Functions, II	97
B. An Alternative Approach to Asymptotic Expansions	98
Chapter 3. Bessel Kernels	101
14. The Asymptotic of $J_{(\lambda, \delta)}(x)$	101
15. Two Connection Formulae for $J_{(\mu, m)}(z)$	102
16. The Asymptotic Expansion of $J_{(\mu, m)}(z)$	107
Chapter 4. Hankel Transforms and Bessel Kernels in Representation Theory	111
17. Hankel Transforms from the Representation Theoretic Viewpoint	111
18. Bessel Functions for $\text{GL}_2(\mathbb{F})$	116
Bibliography	121
