

Contents

Preface	vii
Part 1. Overview	1
Chapter 1. Introduction	5
Chapter 2. DeGiorgi Iteration, Local Boundedness, Maximum Principle and Continuity	9
1. Local boundedness and maximum principle for subsolutions	11
2. Continuity for weak solutions to the homogeneous equation	14
Chapter 3. Organization of the Proofs	17
Part 2. Abstract theory	19
Chapter 4. Local Boundedness	23
1. Orlicz norms	23
2. DeGiorgi iteration	26
Chapter 5. Maximum Principle	33
Chapter 6. Continuity	35
Part 3. Geometric theory	39
Chapter 7. Infinitely Degenerate Geometries	41
1. Calculation of the A -geodesics	41
2. Calculation of A -arc length	43
3. Integration over A -balls and Area	46
4. Higher dimensional geometries	61
Chapter 8. Orlicz Norm Sobolev Inequalities	67
1. Subrepresentation inequalities	67
2. $(1,1)$ -Sobolev and $(1,1)$ -Poincaré inequalities	84
3. Proportional vanishing L^1 -Sobolev inequality	94
4. Orlicz Sobolev inequalities for bump functions Φ_N	96
5. Weak Sobolev inequality	102
Chapter 9. Geometric Theorems	105
1. Proofs of sufficiency	105
2. An unbounded weak solution	107

Part 4. Appendix	115
Appendix A. A Quasilinear Hypocoellipticity Theorem	117
Appendix B. A Monge-Ampère Example	119
Appendix C. Absence of Radial Solutions	121
Bibliography	129
