

Contents

Chapter 1. Introduction	1
1.1. What?	2
1.2. Why? Who?	4
1.3. What is new?	8
1.4. What is not here	9
1.5. What is left?	10
Chapter 2. Methods	13
2.1. Pulling Triangulations	13
2.2. Push-forward subdivisions and pull-back subdivisions	17
2.3. Joins and (Fiber) Products	21
2.4. Toric Gröbner Bases	28
Chapter 3. Examples	33
3.1. Polytopes cut out by roots	34
3.2. Polytopes spanned by roots	38
3.3. Other Graph Polytopes	45
3.4. Lecture hall polytopes	49
3.5. Smooth Polytopes	50
3.6. The Gröbner fan and the toric Hilbert scheme	53
Chapter 4. Dilations and the KMW Theorem	59
4.1. KMW numbers in dimension three	60
4.2. Canonical triangulation of a dilated simplex	63
4.3. Reducing the volume of simplices in the dilation	66
4.4. A proof of the KMW Theorem	71
4.5. An effective version of the KMW-Theorem	73
Bibliography	77
