

Contents

Part 1. Introduction and Preliminaries	1
Chapter 1. Introduction	3
Chapter 2. Preliminaries	9
2.1. Coflat and robust objects	9
2.2. Cowreaths in monoidal categories and entwined module categories associated to them	11
Part 2. A Schneider type theorem for monoidal cowreaths	15
Chapter 3. A pair of adjoint functors	17
Chapter 4. The fundamental theorem for entwined modules over monoidal cowreaths	29
Chapter 5. Total integrals and the structure theorem	41
Part 3. Cleft cowreaths and wreath algebras	53
Chapter 6. Cleft cowreaths	55
Chapter 7. Cleft cowreaths versus wreath algebras	69
Part 4. Applications	85
Chapter 8. Cleft (co)wreaths arising from Doi-Hopf modules over (quasi-)bialgebras	89
Chapter 9. Cleft (co)wreaths arising from crossed products by a coalgebra	93
Chapter 10. Cleft (co)wreaths arising from ν -Doi-Hopf cowreaths	103
Chapter 11. Cleft (co)wreaths arising from generalized crossed products	109
Chapter 12. Cleft (co)wreaths arising from quasi-Hopf bimodules	115
Bibliography	123
