List of Tables	vii
Chapter 1. Introduction	1
1.1. Antecedents	1
1.2. Points and blocks	2
1.3. The main result	2
1.4. Applications	9
Chapter 2. Preliminaries	13
2.1. Conventions	13
2.2. Nichols algebras of diagonal type	13
2.3. On the Gelfand-Kirillov dimension	14
Chapter 3. Yetter-Drinfeld modules of dimension 2	17
3.1. Indecomposable modules and blocks	17
3.2. The Jordan plane	18
3.3. The super Jordan plane	18
3.4. Filtrations of Nichols algebras	20
3.5. Proof of Theorem 3.1.2	21
Chapter 4. Yetter-Drinfeld modules of dimension 3	25
4.1. The setting	25
4.2. Weak interaction	27
4.3. The Nichols algebras with finite GKdim	34
4.4. Mild interaction	40
Chapter 5. One block and several points	49
5.1. The setting	49
5.2. Proof of Theorem 5.1.1 ($\epsilon = 1$)	51
5.3. The Nichols algebras with finite GKdim, V_{diag} connected	62
5.4. Proof of Theorem 5.1.2 ($\epsilon = -1$)	74
Chapter 6. Two blocks	87
6.1. The setting	87
6.2. $\epsilon_1 = 1$	88
6.3. $\epsilon_1 = \epsilon_2 = -1$	95
Chapter 7. Several blocks, several points	101
7.1. Notations	101
7.2. Several blocks, one point	101
7.3. The Nichols algebras $\mathfrak{P}(\mathfrak{q}, \mathcal{G})$	105

7.4. Several blocks, several points	107
Chapter 8. Appendix	113
8.1. Nichols algebras over abelian groups	113
8.2. Admissible flourished diagrams	124
Bibliography	125
