

Contents

Chapter 1. Introduction and Main Results	1
1. Setting	1
2. Heat kernel	4
Chapter 2. Preliminaries	13
Chapter 3. Implications of heat kernel estimates	23
1. $\text{UHK}(\phi) + (\mathcal{E}, \mathcal{F})$ is conservative $\implies J_{\phi, \leq}$, and $\text{HK}(\phi) \implies J_{\phi}$	23
2. $\text{UHK}(\phi)$ and $(\mathcal{E}, \mathcal{F})$ is conservative $\implies \text{SCSJ}(\phi)$	25
Chapter 4. Implications of $\text{CSJ}(\phi)$ and $J_{\phi, \geq}$	31
1. $J_{\phi, \geq} \implies \text{FK}(\phi)$	31
2. Caccioppoli and L^1 -mean value inequalities	32
3. $\text{FK}(\phi) + J_{\phi, \leq} + \text{CSJ}(\phi) \implies E_{\phi}$	44
4. $\text{FK}(\phi) + E_{\phi} + J_{\phi, \leq} \implies \text{UHKD}(\phi)$	47
Chapter 5. Consequences of condition J_{ϕ} and mean exit time condition E_{ϕ}	55
1. $\text{UHKD}(\phi) + J_{\phi, \leq} + E_{\phi} \implies \text{UHK}(\phi)$, $J_{\phi} + E_{\phi} \implies \text{UHK}(\phi)$	55
2. $J_{\phi} + E_{\phi} \implies \text{LHK}(\phi)$	60
Chapter 6. Applications and Example	65
1. Applications	65
2. Counterexample	69
Chapter 7. Appendix	71
1. Lévy system formula	71
2. Meyer's decomposition	71
3. Some results related to $\text{FK}(\phi)$.	72
4. Some results related to (Dirichlet) heat kernel	74
5. $\text{SCSJ}(\phi) + J_{\phi, \leq} \implies (\mathcal{E}, \mathcal{F})$ is conservative	77
