|   |     |
|---|-----|
| Introduction  | vii |
| Chapter 1. Main results   | 1   |
| Chapter 2. Constructing $n$ -excisive approximations                          | 11  |
| Chapter 3. Another construction of polynomial approximations                  | 21  |
| Chapter 4. Coalgebras in stable $\infty$ -operads                             | 25  |
| 4.1. Truncations of $\infty$ -operads   | 25  |
| 4.2. Coalgebras in a corepresentable $\infty$ -operad                         | 29  |
| 4.3. Coalgebras in an $n$ -truncated stable $\infty$ -operad                  | 33  |
| Chapter 5. The space of Goodwillie towers                                     | 39  |
| 5.1. The Tate diagonal  | 39  |
| 5.2. Constructing $n$ -stages   | 44  |
| 5.3. A classification of $n$ -stages  | 49  |
| 5.4. The case of vanishing Tate constructions                                 | 51  |
| Chapter 6. Examples   | 53  |
| 6.1. Divided power coalgebras and Koszul duality                              | 53  |
| 6.2. Rational homotopy theory   | 58  |
| 6.3. Spaces with homotopy groups in a finite range                            | 60  |
| 6.4. Spaces and Tate coalgebras   | 63  |
| 6.5. Further remarks on the Goodwillie tower of the homotopy theory of spaces | 72  |
| Appendix A. Compactly generated $\infty$ -categories                          | 77  |
| Appendix B. Some facts from Goodwillie calculus                               | 79  |
| Appendix C. Truncations   | 83  |
| C.1. The homotopy theory of truncated $\infty$ -operads                       | 83  |
| C.2. Truncations of stable $\infty$ -operads                                  | 92  |
| C.3. A cobar construction for stable $\infty$ -operads                        | 99  |
| C.4. Coalgebras   | 101 |
| Bibliography  | 107 |
