Preface	vii
Acknowledgments	xi
Chapter 1. Introduction	1
Chapter 2. Left Regular Bands, Hyperplane Arrangements, Oriented Matroids and Generalizations	7
2.1. Green's relations and the structure of left regular bands	7
2.2. Free left regular bands and matroids	11
2.3. Free partially commutative left regular bands	14
2.4. Hyperplane arrangements and oriented matroids	14
2.5. Strong elimination systems, lopsided systems and COMs	20
2.6. Complex hyperplane arrangements	23
Chapter 3. Regular CW Complexes and CW Posets	27
3.1. Simplicial complexes and order complexes of posets	27
3.2. Regular CW complexes and CW posets	30
3.3. Oriented interval greedoids	35
3.4. The topology of left regular bands	42
3.5. CAT(0) cube complexes	46
3.6. CAT(0) zonotopal complexes	54
Chapter 4. Algebras	57
4.1. Rings and radicals	57
4.2. Finite dimensional algebras	58
4.3. Quivers and basic algebras	59
4.4. Gradings, quadratic algebras and Koszul algebras	63
4.5. The algebra of a left regular band	64
4.6. Existence of identity elements in left regular band algebras	73
4.7. Cartan invariants	74
Chapter 5. Projective Resolutions and Global Dimension	77
5.1. Actions of left regular bands on CW posets	77
5.2. Projective resolutions	82
5.3. Ext and global dimension	87
5.4. Minimal projective resolutions	92
Chapter 6. Quiver Presentations	95
6.1. A general result	95
6.2. A quiver presentation for CW left regular bands	97

Chapter 7. Quadratic and Koszul Duals	99
7.1. Quadratic duals	99
7.2. Koszul duals	103
Chapter 8. Injective Envelopes for Hyperplane Arrangements, Oriented Matroids, CAT(0) Cube Complexes and COMs	105
8.1. Generalities	105
8.2. Hyperplane arrangements	107
8.3. Oriented matroids	110
Chapter 9. Enumeration of Cells for CW Left Regular Bands	113
9.1. Flag vectors	113
9.2. Cartan invariants	117
Chapter 10. Cohomological Dimension	119
10.1. Cohomology of left regular bands	119
Bibliography	123
Nomenclature	129
Index	133
