Introduction	vii
Acknowledgments	viii
Part 1. Whittaker functions	1
Chapter 1. Basic objects	3
1.1. Notation	3
1.2. Groups and algebras	3
1.3. Whittaker functions	4
1.4. Capelli elements	5
1.5. The gamma function and the Bessel functions	6
1.6. Special functions of two variables	7
Chapter 2. Preliminaries for $GL(n, \mathbb{R})$	11
2.1. Generalized principal series representations	11
2.2. The elements of $\mathfrak{g}_{\mathbb{C}}$ and $Z(\mathfrak{g}_{\mathbb{C}})$	13
2.3. The eigenvalues of generators of $Z(\mathfrak{g}_{\mathbb{C}})$	13
Chapter 3. Whittaker functions on $GL(2, \mathbb{R})$	15
3.1. Representations of $O(2)$	15
3.2. Principal series representations	16
3.3. Principal series Whittaker functions	17
3.4. Essentially discrete series Whittaker functions	20
Chapter 4. Whittaker functions on $GL(3, \mathbb{R})$	23
4.1. Representations of $O(3)$	23
4.2. Principal series representations	25
4.3. Principal series Whittaker functions at scalar K -types	26
4.4. Principal series Whittaker functions at 3 dimensional K -types	29
4.5. Generalized principal series representations	37
4.6. Generalized principal series Whittaker functions	39
Chapter 5. Preliminaries for $GL(n, \mathbb{C})$	47
5.1. Principal series representations	47
5.2. The elements of $\mathfrak{g}_{\mathbb{C}}$ and $Z(\mathfrak{g}_{\mathbb{C}})$	48
5.3. The eigenvalues of generators of $Z(\mathfrak{g}_{\mathbb{C}})$	49
Chapter 6. Whittaker functions on $GL(2, \mathbb{C})$	51
6.1. Representations of $U(2)$	51
6.2. Principal series representations	52
6.3. Principal series Whittaker functions	54

Chapter 7. Whittaker functions on $GL(3, \mathbb{C})$	59
7.1. Representations of $U(3)$	59
7.2. Principal series representations	61
7.3. Principal series Whittaker functions	62
Part 2. Archimedean zeta integrals for $GL(3) \times GL(2)$	69
Chapter 8. Preliminaries	71
8.1. The aim of Part 2	71
8.2. Some formulas for the calculation	72
Chapter 9. The local zeta integrals for $GL(3, \mathbb{R}) \times GL(2, \mathbb{R})$	77
9.1. The local Langlands correspondence for $GL(n, \mathbb{R})$	77
9.2. Preparations for $O(2)$ -modules	79
9.3. Whittaker functions on $GL(2, \mathbb{R})$	80
9.4. Whittaker functions on $GL(3, \mathbb{R})$	81
9.5. The local zeta integrals for $GL(3, \mathbb{R}) \times GL(2, \mathbb{R})$	83
9.6. The calculation for $\sigma' = \chi(\nu'_1, \delta'_2) \boxtimes \chi(\nu'_2, \delta'_2)$	84
9.7. The calculation for $\sigma' = \chi(\nu'_1, 1) \boxtimes \chi(\nu'_2, 0)$	86
9.8. The calculation for $\sigma' = D_{(\nu', \kappa')}$	90
Chapter 10. The local zeta integrals for $GL(3, \mathbb{C}) \times GL(2, \mathbb{C})$	95
10.1. The local Langlands correspondence for $GL(n, \mathbb{C})$	95
10.2. Preparations for $U(2)$ -modules	96
10.3. Whittaker functions on $GL(2, \mathbb{C})$	98
10.4. Whittaker functions on $GL(3, \mathbb{C})$	99
10.5. The local zeta integrals for $GL(3, \mathbb{C}) \times GL(2, \mathbb{C})$	101
10.6. The calculation in the case $d_2 > -d'_2$	103
10.7. The calculation in the case $-d'_1 > d_2$	106
10.8. The calculation in the case $-d'_2 \geq d_2 \geq -d'_1$	108
Appendix A. Archimedean zeta integrals for $GL(2) \times GL(m)$ ($m = 1, 2$)	111
A.1. The local zeta integrals for $GL(2, \mathbb{R}) \times GL(1, \mathbb{R})$	111
A.2. The local zeta integrals for $GL(2, \mathbb{R}) \times GL(2, \mathbb{R})$	112
A.3. The local zeta integrals for $GL(2, \mathbb{C}) \times GL(1, \mathbb{C})$	117
A.4. The local zeta integrals for $GL(2, \mathbb{C}) \times GL(2, \mathbb{C})$	117
