

# Contents

Introduction	1
Chapter 1. A reminder on the Bruhat-Tits building	7
1.1. Stabilizers and Bruhat decompositions	7
1.2. Hecke algebras	9
Chapter 2. Coefficient systems	15
2.1. Coefficient systems and diagrams	15
2.2. Acyclic coefficient systems on the standard apartment	21
Chapter 3. The equivalence of categories	25
3.1. Representations and Hecke modules of stabilizer groups	25
3.2. Coefficient systems and pro- $p$ Iwahori-Hecke modules	34
Chapter 4. Applications to representation theory	43
4.1. Homology in degree zero	43
4.2. Homotopy categories and their localizations	51
4.3. The functor to generalized $(\varphi, \Gamma)$ -modules	56
Bibliography	67
