

Contents

Chapter 1. Introduction	1
1.1. The horocycle flow on eigenform loci	2
1.2. Guide to this Memoir	6
Chapter 2. Strata	9
2.1. Translation surfaces	9
2.2. Strata as sets	10
2.3. Strata of marked surfaces	11
2.4. Strata as spaces	11
2.5. The area form and the area one locus	12
Chapter 3. Blowups of Translation Surfaces	15
3.1. Strata of boundary marked surfaces	16
3.2. Relative homotopy classes of paths	17
3.3. Strata of boundary marked surfaces as spaces	19
3.4. The space of framed surfaces	22
3.5. Action of $G = \mathrm{SL}_2(\mathbb{R})$ and its covers on $\tilde{\mathcal{H}}$	23
3.6. Fundamental groups of covers of strata	25
Chapter 4. The Rel Foliation and Rel Vectorfields	27
4.1. Extending Rel paths	28
4.2. Real Rel	30
4.3. The stabilizer group of a measure	33
4.4. Generic points and real Rel	35
Chapter 5. Horizontal Equivalence of Surfaces	39
Chapter 6. An Explicit Surgery for Real Rel	43
Chapter 7. The Eigenform Locus	53
7.1. Definition of the eigenform loci	53
7.2. G -invariant measures in genus two	55
7.3. Degenerate eigenform surfaces	57
Chapter 8. Construction of U -invariant Ergodic Measures in \mathcal{E}_D	63
8.1. Minimal sets	63
8.2. Framing and splitting	65
8.3. Other U -invariant measures	66
Chapter 9. Classification of Ergodic Measures	69
9.1. The structure of Ratner's proof	70

Chapter 10. Injectivity and Nondivergence	77
Chapter 11. All Horocycle Orbits are Generic	81
Chapter 12. Equidistribution Results for Sequences of Measures	87
Bibliography	95
Index	99
