Chapter 1. Introduction	1
Acknowledgments	4
Chapter 2. Probabilistic and analytic preliminaries	5
2.1. Monte Carlo approximations	5
2.2. Properties of affine functions	7
2.3. A priori estimates for solutions of stochastic differential equations	10
2.4. Stochastic differential equations with affine coefficient functions	15
2.5. Viscosity solutions for partial differential equations	29
Chapter 3. Artificial neural network approximations	35
3.1. Construction of a realization on the artificial probability space	35
3.2. Approximation error estimates	36
3.3. Cost estimates	45
3.4. Representation properties for artificial neural networks	46
3.5. Cost estimates for artificial neural networks	50
3.6. Artificial neural networks with continuous activation functions	59
Chapter 4. Artificial neural network approximations for Black-Scholes partial differential equations	65
4.1. Elementary properties of the Black-Scholes model	65
4.2. Transformations of viscosity solutions	67
4.3. Artificial neural network approximations for basket call options	72
4.4. Artificial neural network approximations for basket put options	74
4.5. Artificial neural network approximations for call on max options	76
4.6. Artificial neural network approximations for call on min options	83
Bibliography	89
