

Contents

Chapter 1. Introduction	1
1.1. Statement of our result	3
Chapter 2. Formal approach	9
Chapter 3. Formulation of the problem	15
3.1. The outer region where $ y > Ks^{1/4}$	16
3.2. The inner region where $ y < 2Ks^{1/4}$	16
3.3. Spectral properties of \mathcal{L}_β	17
3.4. Spectral properties of $\mathcal{L}_{\beta,\delta}$	18
3.5. Decomposition of q	19
Chapter 4. Existence	21
4.1. Proof of the existence assuming technical results	21
4.2. Proof of the technical results	26
4.3. Proof of Proposition 4.8	32
Chapter 5. Single point blow-up and final profile	59
Appendix A. Spectral properties of \mathcal{L}_β	61
Appendix B. Details of expansions of the potential terms: V_1 and V_2	63
Appendix C. Details of some expansions of $B(q)$	67
Appendix D. Details of expansions of $R^*(y, s, \theta'(s))$	69
Appendix E. Formal derivation of constants b and μ	75
Appendix F. Cancellation of some coefficient in the ODE of \tilde{q}_2	85
Bibliography	89
