Chapter 1. Introduction	1
Acknowledgments	6
Chapter 2. Measure-theoretic preliminaries	7
2.1. Some basic notions	7
2.2. Couplings	12
2.3. Closed properties in a coupling space	18
2.4. Localization	19
2.5. Conditional independence in set lattices	23
2.6. Idempotent couplings	25
Chapter 3. Cubic couplings	33
3.1. Conditional independence of simplicial sets	37
3.2. Tricubes	39
3.3. $U^d$ -convolutions and $U^d$ -seminorms associated with a cubic coupling	40
3.4. Fourier $\sigma$ -algebras	42
3.5. Properties of $U^d$ -convolutions	45
3.6. Topologization of cubic couplings	49
3.7. Continuous $U^n$ -convolutions	53
3.8. Topological nilspace factors of $X$	53
Chapter 4. The structure theorem for cubic couplings	61
4.1. Verifying the ergodicity and composition axioms	63
4.2. Complete dependence of corner couplings	64
4.3. Convolution neighbourhoods	67
4.4. Construction of the coupling $\Upsilon$ .	68
4.5. Verifying the corner-completion axiom	73
Chapter 5. On characteristic factors associated with nilpotent group actions	77
Chapter 6. On cubic exchangeability	85
Chapter 7. Limits of functions on compact nilspaces	91
Appendix A. Background results from measure theory	93
Bibliography	99
