Chapter 1. Introduction	1
1.1. Motivation and related work	1
1.2. Notation	4
1.3. Overview of new results	8
1.4. Structure of the paper	17
Acknowledgments	20
Chapter 2. Different classes of coverings and their relations	23
2.1. Admissible and (semi/almost)-structured coverings	23
2.2. Relations between coverings	32
Chapter 3. (Fourier-side) decomposition spaces	39
3.1. Convolution relations for $L^p$ , $p \in (0, 1)$	39
3.2. Definition of decomposition spaces	46
3.3. Well-definedness of decomposition spaces	51
3.4. Completeness of decomposition spaces	56
Chapter 4. Nested sequence spaces	65
Chapter 5. Sufficient conditions for embeddings	83
Chapter 6. Necessary conditions for embeddings	121
6.1. Elementary necessary conditions	123
6.2. Coincidence of decomposition spaces	126
6.3. Improved necessary conditions	152
6.4. Further necessary conditions in case of $p_1 = p_2$	165
6.5. Complete characterizations for relatively moderate coverings	177
Chapter 7. An overview of the derived embedding results	197
7.1. A collection of readily applicable embedding results	197
7.2. Embeddings between decomposition spaces: A user's guide	210
Chapter 8. Decomposition spaces as spaces of tempered distributions	215
Chapter 9. Applications	221
9.1. Embeddings of $\alpha$ -modulation spaces	223
9.2. Embeddings between $\alpha$ -modulation spaces and Besov spaces	231
9.3. Embeddings between homogeneous and inhomogeneous Besov spaces	241
Bibliography	253
