

Contents

Chapter 1. Introduction	1
1.1. Site-percolation on triangulations and Kreweras walks	2
1.2. SLE ₆ on $\sqrt{8/3}$ -LQG and mating of trees	4
1.3. Scaling limit of percolation observables	5
1.4. Future works and directions	7
1.5. Global strategy of the paper	9
Acknowledgments	9
Chapter 2. A bijection between Kreweras walks and percolated triangulations	11
2.1. Basic definitions: maps, site-percolation, and Kreweras walks	11
2.2. The bijection: restricted case	13
2.3. Bijection: general case	16
2.4. Future/past decomposition and an alternative description of the bijection	19
2.5. Bijection: infinite case	22
Chapter 3. Discrete dictionary I: Spine-looptrees decomposition	25
3.1. Spine-looptrees decomposition of a site-percolated triangulation	25
3.2. Spine-looptrees decomposition as a function of the Kreweras walk	27
3.3. Spine-looptrees decomposition in the infinite volume setting	31
Chapter 4. Discrete dictionary II: Exploration tree	35
4.1. Exploration tree associated to a site-percolation configuration	35
4.2. Exploration tree as a function of the Kreweras walk	40
4.3. Exploration tree in the infinite setting	42
Chapter 5. Discrete dictionary III: tree of clusters, envelope excursions, and pivotal points	47
5.1. Tree of clusters, and its relation to the exploration tree	47
5.2. Tree of clusters as a function of the Kreweras walk	48
5.3. Tree of clusters for infinite maps	49
5.4. Envelope excursion of a percolation cycle	51
5.5. Pivotal points of the percolation	53
Chapter 6. Proofs of the bijective correspondences	55
6.1. Proofs for Section 4.1: link between percolation configurations and DFS trees.	55
6.2. Proofs for Section 2.2: the bijection Φ and its relation to the bijection from Bernardi	57
6.3. Proofs for Section 2.3: extending Φ to $\overline{\mathcal{K}}$	59

6.4.	Proofs for Section 2.4: alternative description of $\overline{\Phi}$ and future/past decomposition	61
6.5.	Proofs for Chapter 3: the percolation path as a function of the Kreweras walk.	62
6.6.	Proofs for Section 4.2: the exploration tree as a function of the Kreweras walk.	64
6.7.	Proofs for Chapter 5: dual of the DFS tree and pivotal points in terms of the walk	69
6.8.	Description of the crossing events in terms of Kreweras walks	74
6.9.	Proofs for the infinite volume results	78
Chapter 7.	The mating-of-trees correspondence	83
7.1.	Schramm-Loewner evolutions	83
7.2.	Liouville quantum gravity	86
7.3.	Mating of trees	88
7.4.	Branching SLE_6	91
7.5.	Looptree and forested lines	93
7.6.	Envelope intervals and CLE_6	98
7.7.	Pivotal points and pivotal measure	103
7.8.	Constructions for the disk and sphere	107
7.9.	Percolation crossing events and chordal SLE_6	113
Chapter 8.	Convergence of percolated triangulations to CLE_6 on $\sqrt{8/3}$ -LQG	117
8.1.	Scaling limit for infinite percolated triangulation (whole-plane setting)	117
8.2.	Scaling limit for finite percolated triangulations (disk and sphere settings)	123
8.3.	Towards dynamical percolation and Cardy embedding	126
Chapter 9.	Proofs of the scaling limit results	129
9.1.	Infinite volume case	129
9.2.	Finite volume case	158
9.3.	Proof of Proposition 8.12	162
Appendix A.	Recovering the DFS tree and the walk from the percolated UIPT	167
Bibliography		171
