

Contents

Chapter 1. Introduction	1
1.1. Cluster algebras and coordinate rings	1
1.2. Overview of results	2
1.3. Poisson nilpotent algebras and Main Theorem	3
1.4. Poisson-prime elements, Poisson-UFDs and proof of the Main Theorem	4
1.5. Notation and conventions	6
Chapter 2. Poisson algebras	9
2.1. Poisson algebras and Poisson ideals	9
2.2. Poisson polynomial rings	12
2.3. Differentials of torus actions	13
Chapter 3. Cluster algebras and Poisson cluster algebras	15
3.1. Cluster algebras	15
3.2. Compatible pairs	18
3.3. Poisson cluster algebras	20
Chapter 4. Poisson-primes in Poisson-Ore extensions	23
4.1. Equivariant Poisson unique factorization domains	23
4.2. Poisson-Cauchon extensions	24
4.3. Poisson-prime elements in Poisson-Cauchon extensions	27
Chapter 5. Iterated Poisson-Ore extensions	33
5.1. Poisson nilpotent algebras	33
5.2. Poisson-prime elements in Poisson-CGL extensions	35
5.3. Proof of Theorem 5.4	41
Chapter 6. Symmetry and maximal tori for Poisson-CGL extensions	43
6.1. Symmetric Poisson-CGL extensions	43
6.2. Maximal tori	44
Chapter 7. One-step mutations in Poisson-CGL extensions	49
7.1. A general mutation formula	49
7.2. Almost cluster mutations between Poisson-CGL extension presentations	53
7.3. Scalars associated to mutations of Poisson-prime elements	53
Chapter 8. Homogeneous Poisson-prime elements for subalgebras of symmetric Poisson-CGL extensions	57
8.1. The elements $y_{[i, s^m(i)]}$	57
8.2. The elements of Ξ_N	58

8.3.	A subset of Ξ_N	60
8.4.	Sequences of homogeneous Poisson-prime elements	61
8.5.	An identity for Poisson-normal elements	63
Chapter 9.	Chains of mutations in symmetric Poisson-CGL extensions	67
9.1.	The leading coefficients of the elements $u_{[i,s^m(i)]}$	67
9.2.	Rescaling of the generators of a symmetric Poisson-CGL extension	67
9.3.	Mutations in symmetric Poisson-CGL extensions	69
Chapter 10.	Division properties of mutations between Poisson-CGL extension presentations	71
10.1.	One-step mutations	71
10.2.	Permutations τ_\bullet	72
10.3.	Intersections of localizations	73
Chapter 11.	Symmetric Poisson nilpotent algebras and cluster algebras	77
11.1.	Statement of the main result	77
11.2.	Cluster and frozen variables	80
11.3.	Auxiliary results	82
11.4.	An overview of the proof of Theorem 11.1	86
11.5.	Recursive construction of seeds for $\tau \in \Gamma_N$	87
11.6.	Proofs of parts (a), (b) and (c) of Theorem 11.1	90
11.7.	Completion of the proof of Theorem 11.1	92
	Bibliography	95
	Index	99
